I–TA01 : Adaptive Learning and Computer Control

Multiple-Channel Active Noise Control by ANFIS and Independent Component Analysis without Secondary Path Modeling ............................................................ 1
Eung-Ju Kim, Sang-yup Lee, Beom-Soo Kim, Myo-Taeg Lim (Korea Univ.)

Flexible Labeling Mechanism in Q-Learning for Maze Problems .................................................. 5
Haeyeon Lee, Kenichi Abe (Tohoku Univ.), Hiroyuki Kamaya (Nichinno National College of Technology)

Formation of Attention and Associative Memory based on Reinforcement Learning ...................... 9
Katsunari Shibata (Oita University)

Novel Discrete Optimal Sliding Mode Control ........................................................................ 13
Seung Kyu Park, Ho Kyun Ahn and Min Chan Kim (Changwon Univ.)

Vibration Control of a Intelligent Cantilever Beam with a Distributed PVDF Sensor and PZT Actuator .............................................................. 16
Yeo-Hung Yun, Tae-Kyu Kwon, Seong-Cheol Lee, and Kee-Ho Yu (Chonbuk National Univ.)

I–TA02 : Sensoring and Sensor Fusion

The Development of Collision Avoidance Algorithm for Autonomous Vehicle Using Ultrasonic Range Sensors ........................................................................... 20
K.Bonggyu, P.Youngoon, K.Sanggyum, and K.Jungha (Kookmin Univ.)

On Design of Visual Servoing using an Uncalibrated Camera and a Calibrated Robot ................. 24
Shigeru UCHIKADO, Masahiko MORITA (Tokyo Denki Univ.), Yasuhiro OSA (Kobe City College of Technology), Tesuo MABUCHI (Research Center, TROI, JDA), and Kanya TANYA (Yamaguchi Univ.)

Multi-Sensor Data Fusion Model that Uses a B–Spline Fuzzy Inference System ......................... 28
K. S. Lee, Ahn Doo Sung (Pukyong National Univ.), and S. W. Shin (Yangsan College)

Unsupervised segmentation of Multi–Source Remotely Sensed images using Binary Decision Trees and Canonical Transform ...................................................... 32
R.Sherkat, M. Rahmati, and M. Sadeqi (Amir Kabir University of Technology)

Vehicle Platooning via Sensor Fusion of GPS Carrier Phase and Millimeter–Wave Radar .......... 36
Myung Jin Woo and Jae Weon Choi (Pusan National Univ.)

I–TA03 : Computer Vision–Motion Control

On Enhancing of Inner Loop Regulators for Remote Control in Robotic Systems ...................... 40
Issara Issarangkoon, Warinda Natasiri, Pitikhate Sooraksa, and Prakit Tangtisanon (King Mongkut’s Institute of Technology Ladkrabang)

Dynamic Route Planning by Q–learning – Cellular Automation Based Simulator and Control ...... 43
Masami Hikawa, Hideiji Fujikawa, Koichiro Shida (Musashi Institute of Technology ), and Ben T. Nohara (Virginia Polytechnic Institute and State University)

Tracking Object of Snake based on the Refinement using 5 Point Invariant .............................. 47
Won Kim and Ju–Jang Lee (KAIST)

Collective Motion of Interacting Simple Robot System ........................................................... 51
Ken Sugawara (JIST), Masaki Sano (Univ. of Tokyo), and Toshinori Watanabe (Univ. of Electro–Communications, Tokyo)
I–TA04 : Man–Machine Systems 1

Mobile Robot Control for Human Following in Intelligent Space .............................................. 55
Kazuyuki Morioka, Joo–Ho Lee, Zhimin Lin and Hideki Hasimoto (Univ. of Tokyo)
Development of a Mobile Robot for Handicapped People ...................................................... 59
Shin IGAWA, Hyoung Seop KIM and Seiji ISHIKAWA (Kyushu Institute of Technology)
Optimal Variable Damping Control for a Robot Carrying an Object with a Human ...................... 63
Ryojun Ikeura, Tomoki Moriguchi and Kazuki Mizutani (Mie Univ.)
A Five Degree–of–freedom Pen–based Cable–suspended Haptic Interface .................................. 67
Kyihwan Park, Tie Yun, and Byunghoon Bae (KJIST)
On the Design Method of a Haptic Interface Controller with Virtual Coupling ......................... 71
Keehoon Kim, W. K. Chung, and Y. Youm (POSTECH)
Multi–Camera Vision System for Tele–Robotics ......................................................................... 75
Changhwan Choi, Kyihwan Park (KJIST), Sayaka Odano (Tokyo Engineering Univ.), Hisayuki Sasaki
(Unev. of Tsukuba), Kohtaro Ohba, Nakyong Chong, Tetsuo Kotoku, and Kazuo Tanie (National Inst.
Of Ind. Sci. and Tech.)

I–TA05 : Identification and Estimation 1

Identification of System from Generalized Orthogonal Basis Function Expansions .................... 79
Chul–Min BAE and Kiyoshi WADA (Kyushu Univ.)
Identification of Polymerization Reactor Using Third Order Volterra Kernel Model ...................... 83
Motoki NUMATA, Hiroshi KASHIWAGI and Hiroshi HARADA (Kumamoto Univ.)
Identification of Volterra Kernels of Nonlinear Van de Vusse Reactor ........................................ 87
Hiroshi KASHIWAGI and Li RONG (Kumamoto Univ.)
New Observer design for Linear Systems with Unknown Inputs: Dynamic UIO ......................... 91
Chan–Hoi Kim and Jong–Koo Park (Sungkyunkwan Univ.)
A New Convolutional Weighting Function Method for Continuous–time Parameter Identification 95
Hyun Seob Choi and PooGyeon Park (POSTECH)
Self–Structuring Radial Basis Function Network for Identification of Uncertain Nonlinear Systems 99
Jae–Choon Jun, Jang–Hyun Park, Pil–Sang Yoon, and Gwi–Tae Park (Korea Univ.)

I–TA06 : Control Theory/ Robustness 1

Temperature Control of a Reheating Furnace using Feedback Linearization and Predictive Control 103
Jae Hun Choi, YuJin Jang, and Sang Woo Kim (POSTECH)
Receding Horizon Predictive Control for Nonlinear Time–delay Systems .................................. 107
Wook Hyun Kwon, Young Sam Lee, and Soo Hee Han (Seoul National Univ.)
Output Feedback Receding Horizon Control for Uncertain LTV Systems ................................ 111
Seungcheol Jeong and PooGyeon Park (POSTECH)
Robust Constrained Predictive Control without On–line Optimizations .................................. 115
Y. I. Lee (Seoul National Univ.) and B. Kouvaritakis (Oxford Univ.)
I–TA07 : Computer Vision and Image Processing 1

Automatic Face Detection using Chromaticity and Deformable Templates .................................................. 119
Kwansu Lee, Sung–Oh Lee, Byung–Ju Lee and Gwi–Tae Park (Korea Univ.)

Three Dimensional Volume Reconstruction of Polyhedral Objects Using X–ray Stereo Images .... 123
Young Jun Roh, Byung Man Kim, and Hyung Suck Cho (KAIST)

Separation of Overlapped Objects Using Face Relation Features ................................................. 127
Piljae SONG, Hongjoo CHOI, Hyungtae CHA and Hernsoo HAHN (Soongsil Univ.)

Lane Mine Detecting Technology By Using IR Cameras .......................................................... 131
Nobuhiro SHIMOI (Tokyo National College of Technology), Yoshihiro TAKITA (National Defense Academy), Kenzo NONAMI (Chiba Univ.), Katsumi WASAKI (Shinshu Univ.)

Classification of Arrhythmia Based on Discrete Wavelet Transform and Rough Set Theory ........ 135
M.-J Kim, J.-S Han, K.-H Park, W.-C Bang and Z. Zenn Bien (KAIST)

I–TP02 : Mobile Robot 1

Analysis of Step Climbing and Descending by Tandem Wheelchairs Connected by Passive Link .... 138
Hidetoshi IKEDA, Zhi–Dong WANG, Takayuki TAKAHASHI, and Eiji NAKANO (Tohoku Univ.)

Three Dimensional Environment Modeling for Mobile Robot Using Growing Neural Gas Network ... 142
Min Young Kim, Hyung Suck Cho (KAIST), and Kim Jae Hoon (Samsung Heavy Industries Co.)

Stairs Adaptable Wheeled Mobile Robot using Passive Linkage Mechanism ................................ 146
Chun–Kyu Woo, Soo–Hyun Kim, Yoon–Keun Kwak (KAIST), and Mun–Sang Kim (KIST)

ROBHAZ–DT : Variable Configuration Double Tracked Mobile Robot for Hazardous Environment Applications .................................................................................................................. 150
Changhyun Cho, Changwoo Park, Sungchul Kang, Munsang Kim (KIST), Cheonghee Lee, and Yoon–Keun Kwak (KAIST)

Design of Wheeled Blimp .............................................................................................................. 154
Sungchul Kang, Mihee Nam, Changwoo Park and Munsang Kim (KIST)

Near Minimum–Time Trajectory Planning for Wheeled Mobile Robots with Piecewise Constant Voltages ................................................................................................................................. 158
Jong Suk Choi, Munsang Kim (KIST), and Byung Kook Kim (KAIST)

I–TP03 : Computer Control 1

Natural Language Interface to an Intrusion Detection System .......................................................... 164
K. Wee (Ajou Univ.), T. Collier, G. Kobele, E. Stabler, and C. Taylor (UCLA)

Plasma Control Using a Linear Quadratic Regulated RF Impedance Match Process .............. 168
Byungwhan Kim (Sejong Univ.), Jang Hyun Park, and Gwi Tae Park (Sejong Univ.)

Realization of Nonlinear Driving Controller for Magnetic-type Automatic Pipe–cutting Machine against Varying Gravity ................................................................................................................................. 172
Myung–Chul Lee and Soon–Geul Lee (Kyunghee Univ.)

Vibration Suppression Control for an Articulated Robot: Effects of Model–Based Control Applied to a Waist Axis .................................................................................................................. 176
M. Itoh and H. Yoshikawa (Miyagi National College of Technology)

Performance and Robustness of Discrete Perturbation Observer ............................................... 182
SangJoo Kwon, Wan Kyun Chung, and Youngil Youm (POSTECH)

2001. 10. 17~21, Cheju National University, Jeju, Korea ICCAS 2001
I–TP04 : Man–Machine Systems 2

Analysis of Ambiguous Adverbial Expression Used for Instruction of Positioning Control .......... 186
Shigeyoshi HIRATSUKA, Hikaru INOOKA (Tohoku Univ.), and KAJIKAWA Shinya (Akita Prefectural Univ.)

EMG–based Hybrid Assistive Leg for Walking Aid using Feedforward Controller .........................190
Hiroaki KAWAMOTO and Yoshiyuki SANKAI (Tsukuba Univ.)

Modular Fuzzy Neural Controller Driven by Voice Commands ....................................................194
Koliya Pulasinghe, Keigo Watanabe, Kazuo Kiguchi, and Kiyotaka Izumi (Saga Univ.)

Evaluation of Human Localization using Color Model In Intelligent Space .................................198
Takashi Akiyama, Joo–Ho Lee, Zhimin Lin and Hideki Hashimoto (Tokyo Univ.)

Passivity Problem of Micro–Teleoperation Handling a Insignificant Inertial Object .....................202
Kyoungho Park, W. K. Chung and Y. Youm (POSTECH)

Steering Controller of Outdoor Autonomous Mobile Robot using MR Sensor .........................206
Seok–Jun Son, Tae–Gon Kim, Jeong–Heui Kim, Jin–Kyu Park, Young–Cheol Lim (Chonnam National Univ.), and Eui–Sun Kim (Seonam Univ.)

I–TP05 : Identification and Estimation 2

Evolutionary Computation Approach to Wiener Model Identification ........................................210
Toshiharu Hatanaka, Katsuji Uosaki, and Masazumi Koga (Tottori Univ.)

Stabilization of Nonlinear Discrete–Time Systems in a Frequency Domain ...............................214
Yoshifumi OKUYAMA, Kenji NAKAMORI, and Fumiaki TAKEMORI (Tottori Univ.)

Robust Residual Generator for Fault Detection Using H∞ FIR Estimation Method .....................218

Solvability of Stochastic Discrete Algebraic Riccati Equation ..................................................222
Yibing Tang, Michio Kono (Miyazaki Univ.), and Tatsuo Suzuki (Mitsubishi Heavy Industries)

Multidimensional Spectral Estimation by Modal Decomposition ............................................226
Liu Wei–Ping (Ta Hwa Institute of Technology)

I–TP06 : Control Theory/ Robustness 2

Robust Control for Singularly Perturbed Uncertain Systems with State Constraints .................230
Sang–Yup Lee, Eung–ju Kim, Beom–Soo Kim and Myo–Taeg Lim (Korea Univ.)

Robust and High Performance Control for Optical Disk Drive Systems Using Error based Disturbance Observer .........................................................................................................................234
Kwangjiin Yang, Wan Kyun Chung and Youngil Youm (POSTECH)

Robust H∞ Filtering for Discrete–Time Polytopic Uncertain Systems with Multiple Time Delays 238
Jong Haer Kim and Hong Bae Park (Kyungpook National Univ.)

Robust High Gain Adaptive Output Feedback Control for Nonlinear Systems with Uncertain Nonlinearities in Control Input Term ....................................................................................242
Ryuji Michino, Ikuro Mizumoto, Zenta Iwai and Makoto Kumon (Kumamoto Univ.)

Reliable Robust Control for Singularly Perturbed Systems by Delta Operator Approach ..........246
Kyu–Hong Shin (Sejong Univ.), Charinya Loescharataramdee (KMITL), and M.Edwin Sawan (Wichita State Univ.)

2001. 10. 17~21, Cheju National University, Jeju, Korea ICCAS 2001
I–TP07 : Computer Vision and Image Processing 2

Three-dimensional Reconstruction of Textile Structure Using Discrete Cross Sectional Images to Analyze Fabric Weave Structure .................................................................250
Toshihiro SHINOHARA, Jun-ya TAKAYAMA, Shinji OHYAMA and Akira KOBAYASHI (Tokyo Institute of Technology)

A Vision System for Detecting Paint Faults on Painted Slates ................................................254
T. Carew, O. Ghita and P. F. Whelan (Dublin City Univ.)

Development of Highly Accurate Inspection System for Cylindrical Aluminum Casts with Microscopic Defects ..........................................................................................................................258
S. Okada, M. Imade, H. Miyauchi and M. Idani (National Institute of Advanced Industrial Science and Technology)

Coordinates Matching in the Image Detection System For the Road Traffic Data Analysis ........262
Jinman Kim and Hiesik Kim (The University of Seoul)

A Synthetic Method for Generating Texture Patterns Similar to a Selected Original Texture Image ..................................................................................................................................... 266
H. Tamura, O. Atoda and T. Honda (Tokyo Univ.)

I–TP08 : Control Techniques for Artificial LiferoBot

Fundamental wheel Control for Artificial Life-robot .............................................................. 270
Masanori Sugisaka, Shuichi Otsu and Tosio Maezuma (Oita Univ.)

Image Processing of Artificial Life-robot ................................................................................. 274
Masanori Sugisaka and Shohei Kuriyama (Oita Univ.)

An Inexpensive Ant Robot: Basic Concept and Implementation ............................................. 277
Boonchana Poorahong, Sanya Apiratikorn, and Pitikhate Sooraksa (KMITL)

Improvement on the Image Processing for an Autonomous Mobile Robot with an Intelligent Control System ...........................................................................................................................280
Jiwu Wang (Tsinghua Univ.) and Masanori Sugisaka (Oita Univ.)

A Hybrid Method for Mobile Robot Probabilistic Localization Using a Single Camera ...........284
Andrey A. Loukianov and Masanori Sugisaka (Oita Univ.)

Intelligent Navigation and Control System for a Mobile Robot based on Different Programming Paradigms ...........................................................................................................................288
Tomasz Kubik (Wroclaw Univ. of Technology) and Masanori Sugisaka (Oita Univ.)

I–TE01 : Neural Networks

Control of Chaos Dynamics in Jordan Recurrent Neural Networks .............................................292
Masao Sakai, Noriyasu Homma and Kenichi Abe (Tohoku Univ.)

Evolutionary Designing Neural Networks Structures using Genetic Algorithm ...................... 296
Minoru ITOU and Masanori SUGISAKA (Oita Univ.)

Design of The Pseudo Gaussian Function Network Using Asymmetric Activation Functions ................................................................................................................................. 300
Byung Man Kim and Hyung Suck Cho (KAIST)

An Application of ANN to Automatic Ship Berthing under Disturbances and Motion Identification ................................................................................................................................. 304
Namkyun Im and Kazuhiro Hasegawa (Osaka Univ.)

A New Methodology for the Optimal Design of BSB Neural Associative Memories Considering the Domain of Attraction ............................................................................................... 308
Yonnook Park, Min-Jea Tahnk, and Hyo-Choong Bang (KAIST)
Adaptive Actor–Critic Learning of Mobile Robots Using Actual and Simulated Experiences ..........312
Rafiuddin Syam, Keigo Watanabe, Kiyotaka Izumi, Kazuo Kiguchi (Saga University), and Jin Sang–Ho (Doowon Technical College)

I–TE02 : Mobile Robot 2

Interacting Mobile Robots for Tele–Operation System Using the Internet ..................................317
Kwang–Soo Park and Doo Sung Ahn (Pukyong National Univ.)

Obstacle Avoidance of Underactuated Robot Manipulators Using Switching Computed Torque
Method ...........................................................................................................................................321
Lanka Udawatta, Keigo Watanabe, Kiyotaka Izumi, and Kazuo Kiguchi (Saga Univ.)

An Elastic Joint Manipulator for a Human Friendly Robot .........................................................325
Takahito Taka Hashi, Yasushi Murayama, Zhi–Dong Wang, and Eiji Nakano (Tohoku Univ.)

Using Evolutionary Algorithms to Design Mobile Manipulators ..............................................329
S. Sakka and O. Chocron (LRP)

Object Tracking Algorithm for a Mobile Robot Using Ultrasonic Sensors ..................................333
M. G. Park and M. C. Lee (Pusan National Univ.)

I–TE03 : Computer Control 2

Mamdani Fuzzy PID Controller for Processes with Small Dead Times ........................................337
Saensawasd Kangwan, Saingaron Ornlarp, Panaudomsup Sumit, Komine Noriyuki, and Ngamwiwit
Jongkol (KMITL, Thailand)

Experimental Modeling and Robust Control of an Industrial Overhead Crane ............................341
B. S. Park, T.G. Song, J. Y. Lee, D. H. Hong, J. S. Yoon (KAERI) and E. S. Kang (Chungnam
National Univ.)

Fault Detection System for Front–wheel Steering Passenger Cars ............................................345
Hwan–Seong Kim, Sam–Sang You (Maritime Univ.), Jin–Ho Kim (Doosan Heavy Industries),
Ju–Sik Ha

Monitoring of Industrial Controller using Web Server on Embedded Linux Platform ......................349
ByungWook Choi and DukYun Cho (Sunmoon Univ.)

I–TE04 : Man–Machine Systems 3

Power Assist Control for Walking Aid by HAL Based on Phase Sequence and EMG ......................353
Lee Suwoong and Yoshiyuki Sankai (Univ. of Tsukuba)

An Interactive Interface for Rapid Motion Modification of an Articulated Object Model with Multiple
Joints and Its Application to Kendo Coaching ..................................................................................358
Naoya Yokoyama (Yokohama National Univ.), Fuminori Nakiri, Yasuhiro Kushihashi, Shinya Aoyama,
Tsunenori Honda (Tokyo Univ.)

Communications with a Brain–wave bio–potential based Computer Interface ..............................362
Choi Kyoung Ho and Sasaki Minoru (Gifu Univ.)

EMI and Switching Loss Reductions of a Full–Bridge PWM Converter for DC Motors Drive ........366
Thanasana Sanchanok, Srisawang Arnon, and Prempraneerach Yothin (KMITL, Thailand)

The Analysis on the Deformation of Eledtrostrictive Polymer with respect to Time under Constant
Voltage ..............................................................................................................................................370
Park Kyoung Chul, Youn Ji Won, Jeon Jae Wook, Kim Hunmo, Nam Jae–Do, and Choi Hyoukyerol
(Sungkyunkwan Univ.)

The Evaluation and Optimization of Welding Qualities in the RSW(Resistance Spot Welding) Process

2001. 10. 17~21, Cheju National University, Jeju, Korea 
ICCAS 2001
Using the Servo Controlled Welding Gun .................................................................374
Yeong Je Park(Trimecs Co., Ltd.), Hyung Suck Cho(KAIST) and Ji Hwan Park(Nextech Co., Ltd.)

I-TE05 : Identification and Estimation 3

Thrust Force Estimation using Flexible Neural Networks ........................................382
Myeong Hee Kim, Shigeyasu Kawaji (Kumamoto Univ.), Masaki Arao(Social System Business Company)
On The Zeros of a Multivariable Discrete–Time Control System with Approximate Fractional Order Hold ...............................................................386
Liang Shan, Ishitobi Mitsuaki and Zhu Qin (Kumamoto Univ.)
Control of a Welfare Liferobot Guided by Voice Commands ....................................390
Sugisaka Masanori and Fan Xinjian (Oita Univ.)
Design of Optimal Control for Automatic Train Operation System in EMU ..................394
Han Seong-Ho, Lee Su–Gil, Kim Soo–Gon and Lee Woo–Dong (Korea Railroad Research Institute)
Adaptive LQG Control for Semi–Active Suspension Systems: Disturbance Rejection Capability 398
Sohn Hyun–Chul and Hong Keum–Shik (Pusan National Univ.)
Indirect Self–Tuning Regulator with the Loopshaping .............................................402
Xie Wei and Kamiya Yuji (Kitami Institute of Technology)

I-TE06 : Control Theory/ Nonlinear Application

A Nonlinear Transformation Approach to Adaptive Output Feedback Control of Uncertain Nonlinear Systems .................................................................406
Ahn Choon–Ki, Kim Beom–Soo and Lim Myo–Taeg (Korea Univ.)
Robust Integral Tracking Control of Magnetic Levitating System via Feedback Linearization .....410
Son Won Kee, Choi JInYoung and Kim YongJun (Seoul National Univ.)
A Gain–Scheduled Autopilot Design for a Bank–To–Turn Missile Using LMI Optimization and Linear Interpolation .................................................................414
Shin Myoung Ho, Chung Myung Jin and Lee Chul Hwa (KAIST)
Sliding Mode Control of a Nonlinear Electromagnetic Levitation System ..................418
FUJIMOTO Takashi (Kyushu Sangyo Univ.)
Fast Gain Scheduling Using Fuzzy Disturbance Estimator .......................................422
Lee Seon–Ho (Korea Aerospace Research Institute)

I-TE07 : Soft Computing for Artificial Life robot

Non–parametric Density Estimation with Application to Face Tracking on Mobile Robot ..........426
Feng Xiongfeng, Wang Zheng and Sugisaka Masanori (Oita Univ.)
Color–based Face Detection for Alife Robot ............................................................430
Wang Zheng and Sugisaka Masanori (Oita Univ.)
Graph Coloring Problem Solving by Calculations at the DNA Level with Operating on Plasmids .433
Kubik Tomasz, Bogunia–Kubik Katarzyna and Sugisaka Masanori (Oita Univ.)
Improve Digit Recognition Capability of Backpropagation Neural Networks by Enhancing Image Preprocessing Technique .........................................................437
Jiwu Wang (Tsinghua Univ.), Masanori Sugisaka(Oita Univ.)
Conventional versus Fuzzy Control: Performance Evaluation for Lightweight Cartesian Robot Arms, .................................................................441
Sooraksa Pitikhate and Jirjakam Nuttapong (KMITL, Thailand)

2001. 10. 17~21, Cheju National University, Jeju, Korea ICCAS 2001

Fukuda Yoshio, Ishimatsu Takazu, Higashi Toshio, Nagao Tetsuo, and Takeda Takashi (Nagasaki Univ.)

Motored Wheel Chair for Upper Limb Disabled ...................................................................603
Motohiro Tanaka, Yusuke Shimogama, Yuichiro Yokogawa, Takakazu Ishimatsu(Nagasaki Univ.), Kang Chul Ung(Chujei Univ.), Tsumoru Ochial (Ube college)

Non-contact Sensor to Detect Movement of Dementia Patient ................................................607
Rei Satoh, Seigo Aikhi, Takakazu Ishimatsu, Nobuch Matsuoka(Nagasaki Univ.), Kang Chul Ung(Chujei Univ.)

Sub-Optimal Route Planning by Immuno–Agents ................................................................611
Shiozaki Michiyasu, Fujikawa Hideji, Shida Koichiro and Nohara Ben T. (Musashi Institute of Technology)

I-FP02 : Computer Vision–Mobile

Steering Control of Autonomous Vehicle by the Vision System .................................................615
Moon Hee-Chang, Kim Chang–Man, Kim Sang–Gyum and Kim Jung–Ha (Kookmin Univ.)

Moving Stereo Vision–based Motion Plan by Recognizing the Obstacle Height for Intelligent Mobile Robot ..........................................................619
Yoon Yeo–Hong, Jo Kang–Hyun, Kang Hyun–Deok, and Moon In–Hyuk (Ulsan Univ.)

Fusion of Sonar and Laser Sensor for Mobile Robot Environment Recognition .........................623
Kim Kyung–Hoon and Cho Hyung Suck (KAIST)
Visual Control of Mobile Robots Using Multisensor Fusion System ........................................627
Niwa Shohei and Sezaki Yusuke (Shizuoka Institute of Science and Technology)

Intelligent Tuning of a PID Controller Using Immune Algorithm ...............................................631
Dong Hwa Kim (Hanbat National Univ.), Kaoru Hirota (Tokyo Inst.)

I–FP03 : Spacecraft Control

Sliding Mode Control of Spacecraft with Actuator Dynamics .....................................................642
Cheon Yee–Jin, Keum Jung–Hoon and Sim Eunsup (KARI)

Time Optimal Attitude Maneuver of Three–Axis Spacecraft with Only Magnetic Toquer ..........647
K.M.Roh, K.H.Choi, J.H.Kim (Yonsei Univ.), Sanguk Lee (ETRI)

H ∞ Controllers for Symmetric Systems: A Theory for Attitude Control of Large Space Structures
......................................................................................................................................................651
Masao Ikeda, Kazuhiro Miki (Osaka Univ.), Guisheng Zhai (Wakayama Univ.)

Estimation of the General Along–Track Acceleration in the KOMPSAT–1 Orbit Determination ....655
Lee Byoung–Sun, Lee Jeong–Sook and Kim Jae–Hoon (ETRI)

Mission operations of the KOMPSAT–1 satellite ........................................................................659
Kim Hae–Dong, Choi Hae–Jin and Kim Eun–Kyou (KARI)

Real–Time Software Design using VxWorks for MSC(Multi–Spectral Camera) on KOMPSAT–2 ...663
Heo Haeng–Pal, Yong Sang–Soon, Kong Jong–Pil, Kim Young Sun and Youn Heong Sik (KARI)

I–FP04 : Intelligent Control 2

Evolutionary Design of Takagi–Sugeno Type Fuzzy Model for Nonlinear System Identification and
Time Series Prediction .....................................................................................................................667
Kim Min–Soeng and Lee Ju–Jang (KAIST)

Fuzzy PI with Gain Scheduling Control for a Flexible Joint Robot ..............................................671
Pattaradej Thana, Chumsawee Ketsara, and Sooraksa Pitikhate (KMITL, Thailand)

The Cascade PID Type Fuzzy Control Method .............................................................................675
Jung Hoon Lee, Ki whan Eom (Dongguk Univ.), Yong Gu Lee (Hallym College of Information &
Industry)

Direct Just–In–Time Methods for Nonlinear Control Design ......................................................679
Zheng Qiuobao and Kimura Hidenori (Tokyo Univ.)

A Control Method for Unknown Chaotic Systems .....................................................................683
Yoshimasa Shimizu, Michio Miyazaki (Kanto Gakuin Univ.), Hee–Hyol Lee (Fukuoka Institute of
Technology), Sang–Gu Lee (Hannam Univ.), Kageo Akizuki (Waseda Univ.)

A Study on the Fuzzy Control in the Modeling Equipment of the Height–level of Water by the
Personal Computer ......................................................................................................................687
Munakata Tsunehiro (Hirosima Kokusai Gakuin Univ.)

I–FP05 : Sensors and Measurements 2

Development of Automatic Fillet Welding Torch System with High Speed Rotating Arc Sensor ...691
Lee Won Ki, Lee Gun You, Kim Jin Ho, and Kim Sang Bong (Pukyong Univ.)

Study of Human Perceptual Characteristics of Body Inclination Using a Tilt Bed .........................695
Hayashi Tsuyoshi, Feng Wang, and Inooka Hikaru (Tokyo Univ.)

Development of a Sensor System to Measure Real Time Vibro Displacement of Civil Structure ..699
Kim Hiesik and Bum Sungjun (Seoul National Univ.)

Reckoning of the Agricultural Vehicle in the Field Using Acoustic Ranging ..............................703
Kawamura Tsuneo, Tokuda Masaru and Yoshioka Takahisa (Kobe Univ.)

Unrestricted Measurement Method of Three–dimensional Walking Distance Utilizing Body
I-FP06 : Control Theory 2

A Novel Concept on Stochastic Stability .............................................................. 711
Seo Young Bong and Choi Jae Weon (Pusan National Univ.)

Advanced Disturbance Observer Design .............................................................. 715
Kim Bong Keun and Chung Wan Kyun (POSTECH)

Control of Flexible Link using Mixed H2/H∞and μ–Synthesis Method .................... 719
Choe Yeon-Wook, Lee Hyung-Ki and Bae Jong-il (Pukyong Univ.)

Robust Adaptive Controller Free from Input Singularity for Nonlinear Systems Using Universal Function Approximators ................................................................. 723
Park Jang-Hyun, Yoon Pil-Sang and Park Gwi-Tae (Korea Univ.)

Sufficient and Necessary Condition for Monotone Nondecreasing Step Response of Second–Order System ......................................................................................... 727
Byung-Moon Kwon, Oh-Kyu Kwon(Inha Univ.), Dae-Woo Kim(Medical Research Lab., Unix Electronics Company)

I-FP07 : Control Application 2

Fuzzy Rules Optimizing by Neural Network–based Adaptive Fuzzy Control ................. 731
Sugisaka Masanori and Dai Fengzhi (Oita Univ.)

Self–Organized Reinforcement Learning Using Fuzzy Inference for Stochastic Gradient Ascent Method .............................................................................................. 735
Obayashi Masanao, Iseki Akihiro and Umesako Kousuke (Yamaguchi University)

Remote Controlled Robotic Substitute via Internet .................................................... 739
Takahashi Yoshihiko and Yatsumonji Takayoshi (Kanagawa Institute of Technology)

Development of Laser–Guided Deep–Hole Evaluating Probe: Measurement of Straightness and Roundness ....................................................................................... 743
Byung-Moon Kwon, Oh-Kyu Kwon(Inha Univ.), Dae-Woo Kim(Medical Research Lab., Unix Electronics Company)

Restarting Trains Under Moving Block Signalling – An Expert System Approach ........ 747
Ho T. K. and Wong K. K (Hong Kong Polytechnic Univ.)

I-FP08 : Process Control and Automation

3 Types of Set Point Controllers for Biological Wastewater Treatment Process ............. 751
Kim Dongsoo and Lee In-Beum (POSTECH)

Model on Demand Predictive Control of a Polymerization Reactor ........................... 755
Hur Su-Mi and Park Myung-June, and Rhee Hyun-Ku (Seoul National Univ.)

State Estimation and Property Control in an MMA/MA Copolymerization Reactor ........ 759
Park Myung-June, Hur Su-Mi, and Rhee Hyun-Ku (Seoul National Univ.)

A Study on Optimization of Megasonic Cleaning Process for Manufacturing LCD .......... 763
Kim Young Sook, Kim Hiesik and Choi Gi Sang (Seoul National Univ.)

Development of a User–Friendly Automatic Control System for Electro–Slag Remelting Process .................................................... 767
Lim Tae Gyoon, Ree Chang Woo, and Boo Kwang Suk (Inje Univ.)
I–FE01 : Micro Systems

Design and Analysis of an Electro–Magnetic Micro Gripper for Grasping Miniature Sized Objects
Jaehong Shim(Korea Polytechnic Univ.), Won Choe(Samsung Co.), Kyunghwan Kim(KIST) ........................................ 772

Compliant Micro Actuator made from Dielectric Polymer
Sungwhi Cho(AIST), Sungmoo Ryew, JaeWook Jeon, Hunmo Kim, Jae–Do Nam, Hyoukryeol Choi and Ryutaro Maeda(Sungkyunkwan Univ.) ........................................ 776

Realization of Cilia Motion of Annelida by Distributed IPMC Actuators
Jung Kwangmok, Ryew Sungmoo, Kim Hunmo, Nam Jae–do, Jeon Jae wook and Choi Hyoukryeol (Sungkyunkwan Univ.) ........................................ 780

Teleoperated Microassembly and its Application to Peg-in-Hole Task
Deok–Ho Kim, Yoon0Kyong Kim, Kyunghwan(KIST), Won Choe(Samsung Co.) ........................................ 784

Multiple Vision Based Micromanipulation System for 3D–Shaped Micro Parts Assembly
Seok Joo Lee, Gwi Tae Park(Korea Univ.), Kyunghwan Kim, Deok–Ho Kim, Jong–Oh Park(KIST). ........................................ 789

New Valve Actuator for a Glaucoma Treatment by Using MEMS
Byunghoon Bae, Nakhoo Kim, Kyihwan Park (KJIST), Hongseok Kee, Seonho Kim, Yeon Lee(Le eye on ophthalmic hospital) ........................................ 793

I–FE02 : Robot & Measurement Application

Development of Load Control and Demand Forecasting System
Tipsuwanporn Vittaya, Srisuwan Khomkrit, Suesut Taweepol, Kulpanich Suphan and Roengruen Prapas (KMITL, Thailand) ........................................ 797

Multi–Layer Printed Wiring Board with Built-In Soldering Heater and 3D Implementation of Dynamically Reconfigurable Highly Parallel Processors
Yoshichija Fujiioka, Noburio Tomabechi(Hachinohe Institute of Tech,) ........................................ 801

Formation Approach for Mobile Robots with Inaccurate Sensor Information
Gunhee Kim(KIST), Doo Yong Lee, Kyungno Lee(KAIST) ........................................ 805

Supervisor for Real–Time Nondeterministic Discrete Event Systems under Bounded Time Constraints
Seong–Jin Park(Samsung Electronics), Kwang–Hyun Cho(Ulsan Univ.), Jong–Tae Lim(KAIST) ........................................ 809

Swing–up Control and Singular Problem of an Acrobot System
Nam Taek Kun and Mita Tsutomu (Tokyo Institute of Technology) ........................................ 813

I–FE03 : Pattern Reconignition

Spinal Deformity Detection Based on the Evaluation of Middle Line’s Displacement on a Moire Image of a Human Back
Hyoungseop Kim, Seiji Ishikawa (Kyushu Institute of Technology), Yoshinori Otsuka(National Sanatorium Chiba Higashi Hospital), Hisashi Shimizu(Chiba Health Care Association) and Takashi Shinomiya(Nicon Digital Technos Co.) ........................................ 818

Continuous Korean Sign Language Recognition using Automata based Gesture Segmentation and Hidden Markov Model
Jung–Bae Kim, Kwang–Hyun Park, Won–Chul Bang, Z.Zenn Bien,(KAIST), Jong–Sung Kim(ETRI) ........................................ 822

Two–Input Max/Min Circuit for Fuzzy Inference System
Laipasu Pornchai, Chaikla Amphawan, Jaruwawat Anuchit, Pannil Pittaya, Lee Tipapan and Reiwrut Vanchai (KMITL, Thailand) ........................................ 826

Multipoint Monitoring System based on a Near Infrared Ray(NIR) Acousto–Optic Tunable
I-FE04 : Intelligent Systems 3

Visualization of American Options Using the Roll–Geske–Whaley Model ............................................. 842
Belinda Chew Shu Ling, Sherlyn Chen Wanhui, Fei Tan Toh, Prakash C. Edmond, Lai Edmund (Nanyang Technological Univ.)

Solution of Fuzzy Relation Equations Using Duality of Operators .............................................................. 846
Matsuda Yoshifaka, Azuma Rumiko, Uema Junya, Miyagi Hayao and Kang Dongshik (University of the Ryukyus)

The Development of a Splatting Algorithm for Financial Visualization on Networked and Wireless Applications ........................................................................................................ 850
Deepthi Bhashyakarla, Kui Ou, Khoo Shih Jia, Fei Xiong, Prakash Edmond and Lai Edmund (Nanyang Technological University)

Air–Borne Selection in Micro–Genetic Algorithms for Combinatorial Optimisation ............................... 854
Yunyoung Kim, Masahiro Toyosada, Koji Gotoh(Kyushu Univ.), Jewoong Park(Chosun Univ.)

Automatic Selection of EEG Segments from Long–term Records for Integrative Interpretation of Awake EEG ......................................................................................................................... 859
Masatoshi Nakamura, Takenao Sugi(Saga Univ.), Akio Ikeda, Hiroshi Shibasaki(Kyoto Univ.)

Chaotic Response of a Nonlinear Vehicle Model and Elimination of the Chaos ................................. 863
ZHU Qin, Ishitobi Mitsuaki and Ishimaru Katsuya (Kumamoto Univ.)

I-FE05 : Sensors and Measurements 3

A Digital Signal Processing circuit Design for Position Sensitive Detectors(PSD) using an FPGA ............................ 867
Hahn Bongsu, Choi Changhwan and Park Kyihwan (KJIST)

Nishiymama Ejji, Kuwanemi Kenshi, Matsuda Toyonori, Oota Ichiro and Kawano Mitsunori (Kumamoto National College of Technology)

Development of Digital Stethoscope Diagnosis System for Cardiac Disorder .................................................. 875
JIANG Zhongwei, YAMADA Kazuhiro, FUJII Takashi and MATSUZAKI Masunori (Yamaguchi Univ.)

Guaranteed Stability Margins of the Discrete–Time LQ Optimal Regulator for a Performance Index with Cross–Product Terms ................................................................. 879
Fang Tae Hyun and Choi Jae Weon (Pusan National Univ.)

Realization of High Precision Position Measurement System Using M–sequence Encoded Laser Beam Scanning .................................................................................................................. 883
Takayama Jun–ya, Ohyama Shinji and Kobayashi Akira (Tokyo Institute of Technology)

A New Approach to System Identification Using Hybrid Genetic Algorithm .................................................. 887
Kim Jong–Wook and Kim Sang Woo (POSTECH)
I–FE06 : Control Theory 3

Anticontrol of Chaos for a Continuous–time TS Fuzzy System via Time–delay Feedback ...............891
Zhong Li, Jin Bea Park(Yonsei Univ.), Young Hoon Joo(Kunsan National Univ.)
Adaptive Phase–Locked Loop for Process Control System ..........................................................896
S. Wanchana, T. Benjanarasuth, J. Ngamwiwit(King Mongkut’s Institute of Technology Ladkrabang), N. Komine(Tokai Univ.)
Real Time optimal Control Of Mechanical Systems .......................................................................900
Imafuku Kei, Yamashita Yuh and Nishitani Hirokazu(Nara Institute of science and technology)
Position Control by Fuzzy Logic Controller with Acceleration Converter ....................................904
A. Kanchanathep, J. Ngamwiwit(King Mongkut’s Institute of Technology), S. Tunyasrirut(Pathumwan Institute of Technology), R. Kanawa(Yonago National College of Technology)
Robust Friction Compensation Control Using a Nonlinear Observer ...........................................908
Nakamura Yuichiro and Niwa Shohei(Shizuoka Institute of Science and Technology)
CMOS Current Sum/Subtract Circuit ............................................................................................912
Parnklang Jirawath and Manasphrom Ampaul(KMITL, Thailand.)

I–FE07 : Control Application 3

Robust Sliding Mode Control for Path Tracking of Intelligent Mobile Robot ..................................915
Jiangzhou LU and Ming Xie( Nanyang Technological Univ.)
Character Recognition Based on Adaptive Statistical Learning Algorithm .......................................920
Smoothed Local PCA by BYY data smoothing learning ...............................................................924
Liu Zhiyong and Xu Lei(Chinese Univ.)
Visualization of Elastic Waves Propagating on a Solid Surface with Fatigue Cracks by Laser Ultrasonic Technology ................................................................................................................928
Imade Masaaki, Miyachi Hidekazu, Okada Saburo, Yamamoto Shigeyuki and Takatsubo Jyunji(National Institute of Advanced Industrial Science and Technology)
Adaptive IIR Filter Designed for Separation of Scintillation and Rain Attenuation Phenomena .....932
O. Sangaroon, V. Chutchavong, K. Anekpongpun, C. Benjangkaprasert, P. Sooraksa(King Mongkut’s Institute of Technology Ladkrabang), Y. Moriya(Tokai Univ.)
Introduction of RT–CORBA into Industrial Automation System ..................................................935
Kim An Mo, Ryou Myung Sun and Kwon Wook Hyun(Seoul National Univ.)
Input–Output Feedback Linearizing Control with Parameter Estimation Based On A Reduced Design Model .................................................................................................................939
Noh Kap–Kyun, Shin Dongil and Noh Kap–Kyun(Seoul National Univ.)

I–SA01 : Neural Network and Intelligent System

PAS:Personalized Agent System using Modified Spreading Neural Network .............................943
Cho Young–Im(Pyongtaek Univ.)
Design of An Intelligent Hybrid Controller for Autonomous Mobile Robot ........................................947
Baek Seung–Min and Kuc Tae–Yong(Sungkyunkwan Univ.)
Vision Navigation System by Autonomous Mobile Robot ..............................................................951
Shin Suk Young, Lee Jang Hee and Kang Hoon(Chung–Ang Univ.)
Generating Complicated Models for Time Series using Genetic Programming ............................955
Ikuo YOSHIHARA(Miyazaki Univ.), Moritoshi YASUNAGA(Tsukuba Univ.)

2001. 10. 17~21, Cheju National University, Jeju, Korea ICCAS 2001
I–SA02 : Robot Systems 1

Three Examples of Learning Robots .................................................................959
Graefe Volker and Bischoff Rainer (Bundeswehr Univ.)

A Simple Robust Tracking Controller for Robot Manipulators Using Joint Position Measurements Contaminated by Noises .................................................................963
Wada Makoto, Oya Masahiro, Sagara Shinichi and Kobayashi Toshihiro (Kyushu Institute of Technology)

A Design of Velocity Type Digital Control Systems for Space Robots Using Transpose of GJM ........................................968
Taia Yuichiro, Sagara Shinichi and Katoh Ryozo (Kyushu Institute of Technology)

The Experiment of the Robust Multi–Variable Controller and the LQG/LTR Controller for the Stewart Platform .................................................................972
Heo Seong-Joon, Ko Dong–Woo and Han Myung-Chul (Pusan National Univ.)

Predictive Motion Control Method for Continuous Locomotion of Leg–Wheel Robot .........................976
Kumagai Masatoshi, Takahashi Takayuki, Wang Zhi–Dong, Shoji Michihiko and Nakano Eiji (Tohoku Univ.)

I–SA03 : Guidance Navigation & Control 1

Stationkeeping of an Airship .................................................................................980
Park Chang–Su, Bang Hyo–Choong and Tahk Min–Jea (KAIST)

Dynamic Response of Airship at Cruising State .........................................................984
Kim Chulhwan, Woo Guiaee, Oh Saejong, Cho Kyumrae and Lee Daewoo (Pusan National Univ.)

Longitudinal Flight Control of a Transport Aircraft using Thrust Only .........................987
Ochi Yoshimasa and Kanai Kimio (National Defense Academy)

Mixed Control with Aerodynamic Fin and Side Thruster Applied to Air Defense Missile .................991
Song Chanho and Kim Yoon Sik (ADD)

An Adaptive Flight Control Law Design for the ALFLEX Flight Control System ....................995
Imai Kanta, Shimada Yuzo and Uchiyama Kenji(Nihon Univ.)

I–SA04 : Multi–Agent Systems

A Study of Cooperative Algorithm in Multi Robots by Reinforcement Learning .....................999
Hong Seong–Woo, Choi Gyu–Jong, Bae Jong–Il and Ahn Doo–Sung (Pukyong National Univ.)

Agent–Based Transportation Control with Pheromone Communication ................................1003
Sotobayashi Ken, Nishi Tatsushi, Konishi Masami and Imai Jun (Okayama Univ)

Auction–Based Task Reallocation in Multi–Agent Systems ..............................................1007
Lee Sang G. and Kim In C. (Kyonggi University)

Research of Soccer Robot System Strategies ..................................................................1011
Sugisaka Masanori and Haru Masayoshi (Oita Univ.)

Adaptive Modular Q–Learning for Agents’ Dynamic Positioning in Robot Soccer Simulation ....1015
Kwon Ki–Duk and Kim In–Cheol (Kyonggi University)

A Neuron Model that a Moving Object can be Recognized in the Planer Region ..................1019
Yasuhiro SEKIYA (Miyazaki Univ.) Tomoo AOYAMA, Hiroki TAMURA, Zheng TANG (Toyama Univ.)

2001. 10. 17~21, Cheju National University, Jeju, Korea ICCAS 2001
I–SA05 : Remote Sensing and Control

Development of Real Time Monitoring and Forecasting/Emergency System for Land Slide of Road ................................................................. 1023
Choon–Sik Kim, Soo–Ho Yoon (Korea Univ.) Seung–Mok Shin, Hur Chul , Sang–Bong Kim (Pukyong National Univ.)

Design of A Data Transmission System for Pneumatic System Control ................................................. 1027
Chun Pyo Hong (Taegu Univ.), Dong Soo Kim(KIMM)

LonWorks–based Distributed Monitoring and Control for Predictive Maintenance (PM) .................. 1031
Choi Gi–Heung (Hansung Univ.)

Development of the Geometry PIG for Natural Gas Pipeline and Its Applications ...................... 1036

Repetitive Compensation Control for AGC System By Using Pre–Pass Rolling Data ................ 1040
Hwan Seong KIM(Korea Maritime), Jin Seon PARK, Sang Dol Lee, Keum Jae Lee, Sung Kwan Park (DongKuk Univ.)

I–SA06 : Control Theory 4

Some Integral Equalities Related to Laplace Transformable Function ........................................ 1044
Byung–Moon Kwon, Oh–Kyu Kwon(Inha Univ.)Myung–Eui Lee(Korea Univ.)

Two–degree–of–freedom Control for Descriptor System with Disturbance ................................... 1048
YEU Tae Kyeong and KAWAJI Shigeyasu (Kumamoto Univ.)

FFC Design for PI Flow Control System Designed by CDM ................................................................. 1052
D. Kumpanya, T. Benjanarasuth, J. Ngamwiwit (King Mongku’s Institute of Technology)
N.Komine(Takai Univ.)

Chattering–Free Sliding Mode Control with a Time–Varying Sliding Surface .............................. 1056
Tai Hyun Kyung, Jong Shik Kim(Pusan National Univ.),Kyu–Joon Lee(ADD)

Discrete–Time Sliding Mode Control for Linear Systems with Matching Uncertainties ............ 1060
Myoen Kohei, Hikita Hiromitsu, Hanajima Nachiko and Yamashita Mitsuhisa (Muroran Institute of Technology)

I–SA07 : Control Device Smart Actuators

Switching Angle Control of a High Speed Switched Reluctance Motor Using an FPGA Circuit .... 1064
Choi Changhwan, Kim Yongdae and Park Kyihwan (KIIST)

Comparison Study of EMI and Switching Loss Reductions of Unipolar and Improved Limited Unipolar Switching Circuits. ......................................................... 1068
Srisawang Arnon, Thanasana Sanchanok and Prempraneerach Yothin (KMITL, Thailand)

Vibration Control of a Framed Structure by an Air–pulse Actuator .............................................. 1072
T. Fujimoto(Kyushu Sangyo), Cao Fengying, and Y.Mori (Kyushu Sangyo Univ.)

Using FPGA for Real–Time Processing of Digital Linescan Camera ..................................... 1076
Heon Jeong, Nam–Chae Jung(Chodang univ.),Han–Soo Choi(Chosun Univ.)

2001. 10. 17~21, Cheju National University, Jeju, Korea ICCAS 2001
I-SA08 : Virtual Reality

A Virtual Bike Simulator System for Balance Rehabilitation Training Using Virtual Reality .......... 1080
Jong Yun Kim, Chul Gyu Song and Nam Gyun Kim (Chonbuk National Univ.)

Producing a Virtual Object with Realistic Motion for a Mixed Reality Space .................. 1084
Hirohashi Daisuke, Tan Joo Kooi, Kim Hyoung Seop and Ishikawa Seiji (Kyushu Institute of Technology)

Development of A Wearable Input Device Recognizing Human Hand and Finger Motions as A New Mobile Input Device. ................................................................. 1088
Dae H. Won, Ho G. Lee, Jin Y. Kim, (KITECH) Jong H. Park(Hanyang Univ.)

Learning of Skilled Typist's Finger Positioning for New Input Device Scheme .................. 1092
Jin-Young Kim, Ho-Gil Lee, Sung-Ho Hwang( KITECH) Hyouk-Ryeol Choi( Sungkyunkwan Univ.)

A Study on the Virtual Indoor Scene Navigation .............................................................. 1098
Kim Yeong-Seok, Jho Cheung-Woon and Yoon Kyung-Hyun (Chung-Ang Univ.)

Putting Your Best Face Forward: Development of a Database for Digitized Human Facial Expression Animation .......................................................... 1102
Sung Lee Ning, Reid Alia, Yu Zhang, Prakash Edmond, Chan Tony and Lai Edmond (Nanyang Technological Univ.)

I-SP02 : Robot Systems 2

Design and Performance Evaluation of Self–Localization with Landmarks .......................... 1106
Ono Yukihiko, Takahashi Takayuki, Shouji Michihiko and Nakano Eiji (Tohoku Univ.)

A Teleoperated Bilateral Control System for Heavy Duty Tasks .................................... 1110
Ahn Sung Ho, Kim Sung Hyun, Hong Dong Hee and Yoon Ji Sup (KAERI)

Cooperative Foraging Behavior of Multi Robot System with Simple Interaction ................. 1114
Ken Sugawara(JST), Masaki Sanof (Univ. of Tokyo), Kuo Yoshihara (Miyazaki Univ.), Kenichi Abe(Tokyo Univ.), Toshinori Watanabe(Univ. of Electro–Communications)

Inertia Property–Based Redundancy Resolution in Posture Control of Mobile Manipulator ...... 1118
Sungchul Kang(KIST), Kiyoshi Komoriya, Kazuhiro Yokoi, Tetsuo Koutoku and Kazuo Tanie(AIST)

Robust Predictive Control of Robot Manipulator with The Bound Estimation ..................... 1122
Ha In Chul, Kim Jung Kwon and Han Myung Chul (Pusan National Univ.)

I-SP03 : Guidance Navigation & Control 2

Compensation for the Body–Coupling in the 2–Gimbaled Seeker Homing Loop on BTT Missile .... 1126
Jeong Sangkeun, Kim Eulgon, Song Chantho and Cho Hangju (ADD)

Trajectory Optimization of a Hypersonic Airplane ......................................................... 1130
Takano Hiroyuki and Baba Yoriaki (National Defense Academy)

Synthesis and Investigation of the Neural Network Guidance Based on Pursuit–Evasion Games ................................................................. 1133
Han–Lim Choi, Min–Je Tahn, and Hyo–Choong Bang (Korea Advanced Institute of Science and Technology), Hun–Gu Lee(Space Technology Research Center)

Evaluation of the Performance of Re–entry System for the Typical Uncertainties ............... 1137
L. Daewoo, and C. Kyeumrae(Pusan National Univ.),P. Soohong(Dongseo Univ.)

Stabilization Loop Design Method on Dynamic Platform .................................................. 1141
Young Shin Kwon, Doh Hyun Kim, Lee Han Kim( R&D 3Group, LG Innotek), Hong Yeon Hwang(ADD)

A Study on Automatic Air Combat Simulation ............................................................... 3040
Fumiaki IMADO, Keltchi FURUKAWA(Shinshu Univ)., Yoichiro OZAWA(Yamazaki Mazak), Tomokazu MORI(Japan Photoelectronic Ind.)
I-SP04 : Fault Diagnosis

Diagnosis of Processing Equipment Using Neural Network Recognition of Radio Frequency Impedance Matching ...................................................................................................... 1145
Kim Byungwhan (Sejong University)

Transformet Differential Relay by Using Neural-Fuzzy System ............................................. 1149
V. Tipsuwanporn, A. Ekcheewanon, T. Suesut, J. Indra-payoong (King Mongkut’s Institute of Technology Ladkrabang), A. Charean (Kasem Bundit Univ.)

Proper Decision for Maintenance Intervals of Equipment in Power Stations by Considering Maintenance Replacement Rate and Operation Rate .............................. 1153
Masatoshi Nakamura (Saga Univ.), Yoshihiro Suzuki, Hironori Hatazaki (Kyushu Electric Power co., Ltd)

Fault Detection and Diagnosis of Dynamic Systems with Sequentially Correlated Measurement Noise .................................................................................................................. 1157

Neurofuzzy Estimation for Fault Location Based On PLC ..................................................... 1161
Tipsuwanporn Vittaya, Rukkaphan Suthee, Kongratana Viriya, Numsumran Arjin and Tuppadung Yuttapong (KMITL, Thailand)

I-SP05 : Signal Processing

Simplified Neuron Functions for FPGA Evaluations of Engineering Neuron on Gate Array and Analogue Circuit ........................................................................................................ 1165
Saito Masayuki, Wang Qianyi and Aoyama Tomoo (Miyazaki Univ.)

An Algorithmic Gray Code ADC Using Triangular Function Circuit ........................................ 1169
Reiwruja Vanchai, Pukkalanum Tattaya, Julprapa Attaya, Chaikla Amphawan, Julsereewong Prasit and Jarawanawat Anuchit (KMITL, Thailand)

Design and implementation of signal processing system for airborne active homing radar ........ 1173
Young Sung Lee, Doh Hyun Kim, and Lee Han Kim (LG Innotek), Young Chae Kim (Agency for Defense Development)

Electronically Adjustable Gain Instrumentation Amplifier ...................................................... 1177
Reiwruja Vanchai, Julprapa Attaya, Chaikla Amphawan, Ukakimaparin Prapath, Parnklang Jirawath and Suphap Somchai (KMITL, Thailand)

An Active-Only Voltage-Mode Integrator and Its Applications ............................................ 1181
Tangsrirat Worapong and Surakampontorn Wanlop (KMITL, Thailand)

Tracking Error Extraction Algorithm in Monopulse Active Homing Radar System .............. 1185
Jun-Beom Kwon, Do-Hyun Kim, and Lee-Han Kim (LG Innotek), Young-Jin Byun (Agency for Defense Development)

Analysis of Inspection Panel’s Ability Using BMPC Method .................................................. 1189
Toriumi Fujio, Takayama Jun-ya, Ohyama Shinji and Kobayashi Akira (Tokyo Institute of Technology)

I-SP06 : Measurement

Receding Horizon FIR Parameter Estimation for Stochastic Systems ..................................... 1193
Lee Kwang Ho, Han Soo Hee, Lee Changhun and Kwon Wook Hyun (Seoul National Univ.)

Homogeneous Robust Systems Control on Limitations in the Space State .......................... 1197
Pilishkin Vladimir N. (Bauman Moscow State technical Univ.)
I-SP07 : Automation Control

Experimental Study on Automatic Snowplows .............................................................. 1201
Suzuki Soichiro, Kumagami Hiroshi, Miyakoshi Katsumi, Haniu Hiroyuki and Tsunemoto Hideyuki (Kitami Institute of Technology)

Individual Cylinder Spark Advance Control Using Cylinder Pressure in SI Engines ............ 1205
Seungbum Park, Myoungho Sunwoo (Hanyang Univ.) Paljoo Yoon (Mando Corporation)

A Study on the Automatic Lane Keeping Control Method of a Vehicle Based upon a Perception Net .......................................................................................................................... 1210
Kim Kyungkeun, Song Jeonghoon and Boo Kwangsuk (Inje Univ.)

Hybrid Control for the Platoon Maneuvers with Lane Change ........................................... 1214
Jeon Seong Min and Choi Jae Weon (Pusan National Univ.)

Cruise Control of Automated Mechanical Transmission Automobiles .................................. 1218
Guihe Qin, Anlin Ge (Jilin Univ.), Jiehong Zhao (ChangChun engineering College), Ju-Jang Lee (KAIST)

I-SE01 : Fuzzy Logic Evolutionary Artificial Life and Intelligence Computation

New Boundary-Handling Techniques for Evolution Strategies .............................................. 1222
Choi Han-Lim and Tahk Min-Jea (KAIST)

New Mutation Rule for Evolutionary Programming Motivated from the Competitive Exclusion Principles in Ecology .................................................................................................. 1226
Jung-Hwan Shin (Kyungpook Univ.), Doo-Hyun Choi (Seoul National Univ.), Sung-II Chien (Kyungpook Univ.)

Character Animation of Realistic Humans ........................................................................ 1230
Edwina Quek, Lim Jun Pei, Lai Looi Seng, Cui Jing, Edmond C. Prakash and Edmund M-K. Lai (Nanyang Technological Univ.)

I-SE02 : Control Theory/Application

A study on the ECU and Control Algorithm of ABS for a Commercial Vehicle ....................... 1234
Lee Ki-Chang, Kim Mun-Sup, Jeon Jeong-Woo, Hwang Don-Ha, Park Doh-Young and Kim Yong-Joo (KERI)

One Proposal of Vector Control Method of Wound-Rotor Induction Motor .......................... 1238
Sugimoto Hidehiko and Kawasaki Shoji (Fukui Univ.)

Modeling and Control of Active Suspension System with Full Car Wheels ............................ 1242
Trong Hieu Bui, Sang Bong Kim (Pukyong National Univ.), Choong Hwan Lee, Min Saeng Shin (Yang-San College)

Modeling and Control of Gantry Crane with Arm Type of Oscillation Stopper ....................... 1246
Soung Jea Park, Kwang Zu Kim, Sang Bong Kim (Pukyong National Univ.), Tan Tien Nguyen (Hochiminh City Univ.), Min Seng Shin (Yangsan College)

Predictive Control of Telerobot with Time Delay ................................................................ 1250
Yoon In Hyung, Kim Jung Kwan and Han Myung Chul (Pusan National Univ.)

Attitude Control of a Vehicle under the Disturbances by Sliding Mode Controller with Reaction Jets ..................................................................................................................... 1254
Sung-Han Son, Jinsu Kim, Kang-Bak Park (Korea Univ.), Teruo Tsuji, Tsuyoshi Hanamoto (Kyushu Institute of Technology)
I–SE03 : Guidance Navigation & Control 3

Lateral Stability/Controllability Derivatives Estimation of Canard Type Airplane from Flight Test

Optimal Guidance and Nonlinear Tracking Control for a Lunar Lander

Nakajima Shingo, Uchiyama Kenji and Shimada Yuzo (Nihon Univ.)

Design of a Gimbal–Structured Micro Gyroscope and Signal Processing Part

Dynamic and Stochastic Modeling of Litton’s Space Inertial Reference Unit

Choi Hong-Taek, Yong Ki-Lyuk and Suk Byong-suk (KARI)

Windowed Quaternion Estimator For Gyroless Spacecraft Attitude Determination

Kim Injung and Kim Jinho (Seoul National Univ.)

Navigation based on Multi Cylindrical Environment Map

Park Young Sup, Ko Hye Kyung, Jho Cheung Woon and Yoon Kyung Hyun (Chung-Ang Univ.)

I–SE04 : Computer Vision–Man Machine Interface

An application of Active Vision Head Control Model–based Compensating Neural Network Controller

Kumarawadu Sisil, Watanabe Keigo, Kiguchi Kazuo and Izumi Kyotaka (Saga Univ.)

Intelligent User Interface for Teleoperated Microassembly

Song Eun–Ha, Kim Deok–Ho, Kim Kyungwhan and Lee Jae-hoon (KIST)

Occurred Seasick Impression and Analysis of the Observer’s Heart Rate Variability by using Ship’s Bridge Simulator

Murai Koji and Hayashi Yuki (Kobe Univ.)

Fish School Simulation for Khepera Robot

Tabuse Masayoshi, Horita Takahiro, Shinchi Tatsuro and Kitazoe Tetsuro (Miyazaki Univ.)

I–TMP : International Poster Session

Implement High Speed Bidirection Pulse Power Supply for Plating

Kim Tae–Eon, Park Jong–Oh, Cho Yong–Seong, Lee Ihn–Young, Kim Young–Han and Lim Young–Do (Dong–A Univ.)

Robust Adaptive Control of Nonlinear Output Feedback Systems under Disturbances with Unknown Bounds

The Conceptual Design of the x y q Fine Stage and Its Optimal Design to Obtain Fast Response in Lithography System

Kim Dong–Min, Kim Ki–hyun, Lee Sung–Q and Gweon Dae–Gab (KAIST)

A Vibration–Reaction Control for a Magnetic Suspension System

Backstepping Control of Robot Manipulators Driven by Induction Motors Using Neural Networks

Jung–Wook Kim, Dong–Hun Kim (Duke Univ.), Hong–Pil Kim (Kyungil Univ.), Hai–Won Yang(Hanyang Univ.)

A Robust Levitation Controller Design for Electromagnetic Levitation System

2001. 10. 17~21, Cheju National University, Jeju, Korea

ICCAS 2001
Vibration Control of an Axially Moving Belt by a Nonlinear Boundary Control
Choi Ji-Yun and Hong Keum-Shik (Pusan National Univ.)
Application of the Robust Control Theory for the Dynamic Voltage Restorer
Chun Yeong-Han, Kim Ji-Won and Jeon Jin-Hong (KERI)
A Study on the Autonomous Navigation of Rovers for Mars Surface Exploration
Kim Han-Dol and Kim Byung-Kyo (KARI)
A Study on the Optimal Model Following Sliding Mode Control
Kim Min-Chan and Park Seung-Kyu (Changwon National Univ.)
Design of Optimal Sampled-Data Controller for Continuous-Time Chaotic Systems
Kwang Sung Park, Jin Bae Park(Yonsei Univ.) and Yoon Ho Choi (Kyonggi Univ)
Steady State Optimal Control of Discrete Weakly Coupled Bilinear Systems
Kang Hyun-Goo, Kim Beom-Soo and Lim Myo-Taeg (Korea Univ.)
Extended Kalman Filter Approach to Dynamic Electrical Impedance Tomography with Internal Electrodes
S.I. Kang, K.Y. Kim, H.C. Kim M.C. Kim, S. Kim, H.J. Lee, and Y.J. Lee (Cheju National Univ.), W.C. Cho(Kyungdo Provincial College)
Output–Feedback Control of Uncertain Nonlinear Systems Using Adaptive Fuzzy Observer with Minimal Dynamic Order
Park Jang-Hyun, Huh Sung-Hoe and Park Gwi-Tae (Korea Univ.)
Robust Wavelet Kalman Filter
Taehoon Lee, Jinbae Park (Yonsei Univ.), Taesung Yoon (Changwon Univ.)
Closed-loop Feedback Control for Enhancing QoS in Real-time Communication Networks
Kim Hyung Seok and Kwon Wook Hyun (Seoul National Univ.)
Design of a Voting Mechanism considering Safety for Reliable System Using EPLD and Reliability Analysis
Ryoo Dong-Wan, Lee Hyeong-Jik and Lee Jeun-Woo ETRO
A Design and Implement of the Medical Nd:YAG Laser Firmware under in ZCC method
Park Jang-Hyun, Seo Ho-Joon and Park Gwi-Tae (Korea Univ.)
Robust Adaptive Controller for MIMO Nonsquare Nonlinear Systems Using Universal Function Approximators
Park Jang-Hyun, Seo Ho-Joon and Park Gwi-Tae (Korea Univ.)
Adaptive Parameter Estimator Design for Takagi–Sugeno Fuzzy Models
Chang–Woo Park, Chang–Hoon Lee, Mignon Park(Yonsei Univ.) Seungho Kim(Korea Atomic Energy Research Institute)
Acquisition of Fuzzy Control Rules using Genetic Algorithm for a Ball & Beam System
Cho SungBae, Park KyungHun and Lee YangWoo (DongEui Univ.)
Model–based Predictive Control Approach to Continuous Process based on Iterative Learning Concept
In Sik Chin, Moon Ki Cho, Jay H. Lee (Sogang Univ.)Kwang Soon Lee (Georgia Institute of Technology)
The Design of Adaptive Fuzzy Controller for Vibration Suppression
Kim Seung–Cheol, Sul Jae–Hoon, Park Jae–Hyung, Lim Young–Do and Choi Book–Kwi (Dong–A Univ.)
Decentralized Input–Output Feedback Linearizing Controller for MultiMachine Power Systems:
Adaptive Neural–Net Control Approach
Park Jang–Hyun, Jun Jae–Choon and Park Gwi–Tae (Korea Univ.)
LQR Controller Design for Active Suspensions using Evolution Strategy and Neural Network
Jong–Min Cheon(Korea Electrotechnology Research Institute), Young–Kiu Choi, Sungshin Kim, Dae–Jun Kim, Min–Jung Lee (Pusan National Univ.)
Neural Networks which Approximate One–to–Many Mapping
Lee Choon–Young and Lee Ju–Jang (KAIST)
The Design of Controller for Unlimited Track Mobile Robot
Han–Soo Choi(Chosun Univ.), Heon Jeong(Chodang Univ.), Sei–Seung Park(Chosun Univ.)
Fuzzy Control of Anti–Sway Motion for a Remote Crane Operation
T.J. Lho, H.W. Joo(Tongmyong Univ.), W. B. Baek(Doosan Heavy Industry Co.)
I-FMP : International Poster Session

Bi-directional Actuator using a Permanent Magnet and Solenoid ............................................................ 1418
Kim Ki-hyun, Kim Dong-min, Lee Sung-Q and Gweon Dae-Gab (KAIST)

Control of IEEE1394 Digital Home Appliances using AV/C Command Set ..................................................1422
Kim Il-jung and Park Jong-an (Chosun Univ.)

Detection and Location of Partial Discharge in Oil Filled Transformer .......................................................1426
Seung-Whan Lee, Hak-Joon Oh and Chan-Soo Chung (Soongsil Univ.), Man-Soo Yun (Seoul Jeongsu Polytechnic college)

A Tape Feeder Inspection System for Measuring Feeding Accuracy ............................................................1430
Tai-Hoon Cho (Korea Univ. of Technology and Education)

Design of an Adaptive Nonlinear Compensator using a Wavelet Transform Domain Volterra Filter and a Modified Escalator Algorithm ..........................................................1434
Hwang Dong-Oh, Kang Dong-Jun and Nam Sang-Won (Hanyang Univ.)

Adaptive Algorithm for Double-Talk Echo Cancellation .................................................................................1438

Nonlinear Model Based Control of Two-Product Reactive Distillation Column .................................. 1600
Myungwan Han (Chungnam National Univ.)

Constrained Digital Regulation of Hyperbolic PDE Systems: A Learning Control Approach ............... 1604
Jinhoon Choi, Beom Joon Seo, Kwang Soon Lee (Sogang Univ.)

Analytical Method to Design Multiloop Control Systems via DCLR .................................................. 1608
Kim Changgeun, Daewoong Chun, Jietae Lee (Kyungpook National Univ.) Kihong Lee, Monyong Lee (Youngnam Univ.)

Design of Glide Slope Capture Logic Using Model Inversion .......................................................... 1612
HyungSik Choi, CheolKeun Ha (Ulsan Univ.) ByoungSoo Kim (Kyungsang Univ.)

D-TA02 : Robot Systems 1

Comparative Study on the Stability and the Performance in Bilateral Teleoperation ............................ 1616
Kim Jin Wook, Kim Hyung Wook, Yi Byung Ju and Suh Il Hong (Hanyang Univ.)

Development of a Real-Time Vehicle Driving Simulator ................................................................. 1620
Kim Hyun Ju, Park Min Kyu, Lee Min Cheoul and You Wan Suk (Pusan National Univ.)

Design of Stabilization Algorithm for unmanned Bicycle ............................................................... 1624
Moon Jiwoon, Lee Sangduck and Ham Woonchul (Chonbuk National Univ.)

Development of an Exclusive Sensor for Detecting Positions of Field Robot Arms ......................... 1628
Kim Jong Hwa (Korea Maritime University) and Yang Soon Yong (Univ. of Ulsan)

Forward Velocity Estimation Algorithm for Planar Mobile Robots ............................................... 1632
Seung-Eun Lee, Wheekuk Kim, Byung-Ju Yi and Bum-Jae You (Korea Univ.)

Compliance Control of a Five-bar Mechanism .................................................................................. 1636
Kim Chong-Sup, Yi Byung-Ju, Suh Il-Hong (Hanyang Univ.) and Oh Sang-Rok (KIST)

D-TA03 : Factory Automation and CIM 1

A Study on the Realization of Protocol Stack for I/O Elements Control for Multi-devices and Field Level ....................................................................................................................... 1640
Kwak Chang-Yong, Kim Tae-Hwa, Kwon Soon-Jae (Pukyong National Univ.) and Son Jeong-Ki (Korea Port Training Institute)

A Path Planning of Dispenser Machines in PCB Assembly System Using Genetic Algorithm .......... 1644
Woo Minjung, Lee SooGil and Park Tae Hyoung (Chungbuk National University)
D-TA04 : Sensors and Measurements 1

The Development of Rugged Embedded Measurement System by using PXI Bus .......................... 1656
Yu Jae Taeg, Kim Dae Won, Goo Sang Haw(ADD) and Lee Jang Myung(Pusan National Univ.)
Measurement of a Shape of Glass using the Hologram Optical System ........................................ 1660
Lee Young Chon, Youn Sang Pil and Ryu Young Kee(Sunmoon Univ.)
Development of a Shape Inspection System of the Light Guide Panel .......................................... 1664
Youn Sang Pil, Lee Young Chon and Ryu Young Kee (Sunmoon Univ.)
Development of On-Line Work Roll Surface Monitoring System at Hot Strip Mill .......................... 1668
Bae Ho Moon (POSCO)
Development of Gap Measuring System between Strip and Air knife in Continuous Galvanizing Line .................................................................................................................................. 1672
Shin kitae and Chae Hongkuk (RIST)
Maneuvering Target Tracking with the Modified VDIE Filter ....................................................... 1676
Ahn Byeong Wan, Whang Tae Hyun, Choi Jae Won (Pusan National University) and Song Taek Lyul (Hanyang Univ.)

D-TA05 : Control Theory 1

Covariance Controller Design for Linear SISO Systems .......................................................... 1680
Kim Hochan, Oh Seongbo(Cheju National Univ.) and Ko Bongwoon(Cheju College of Technology)
Payload-Swing Suppression of a Container Crane: Comparison Between Command Shaping Control
and Optimal Control ..................................................................................................................... 1684
Huh Chang-Do and Hong Keum-Shik (Pusan National Univ.)
Controller Design of the 2nd-order System Based on Phase Margin Specifications ..................... 1688
Lee Bohyung (LG Electronics)
Adaptive Control with Antiwindup Scheme for Relaxed Static Stability(RSS) Missiles with Saturating
Actuator ....................................................................................................................................... 1691
Kim Young Hwan, Chwa Dong Kyung, Im Ki Hong and Choi Jin Young (Seoul National Univ.)

D-TA06 : Computer Vision and Image Processing 1

Recognizing Method of Foot Characteristics by Pressure Image Analysis ................................. 1695
Hwang Yong Bae, Lee Soon-Geul and Yoon Sang-Cheun (Kyunghee Univ.)
Face Recognition using Feature Information and Neural Network ........................................... 1699
Chung Jae Mo, Bae Hyeon and Kim Sungshin (Pusan National Univ.)
Real-time Facial Recognition using the Geometric Informations ............................................... 1703
Bae Hyounjin and Kuc Taeyong (Sungkyunkwan univ.)
A Study on the Automatic Diagnosis of ECG ............................................................................. 1707
Jeong Gu Young, Yu Kee Ho, Kwon Tae Kyu and Lee Seong Cheol (Chonbuk National Univ.)
A Study on CRM(Center of Rotation Method) based on MST(Minimum Spanning Tree) Matching
Algorithm for Fingerprint Recognition ...................................................................................... 1711
Kwon Hyoungki, Lee Junho and Ryu Youngkee (Sunmoon Univ.)
D-TA07: Aerospace Technology 1

In-flight Alignment Algorithm using Uplinked Radar Data Including Time Delay .................................................................................................................. 1715
Park Chan Ju, Kim Heun Beik and Song Gi Won (ADD)

Minimum Sensing Angular Velocity Improvement of Ring Laser Gyro using a Low-Scattering Mirror .................................................................................................................. 1719
Jo Min-Sik, Shim Kyu-Min, Kim Hoe-Young, Cho Hyun Ju (Agency for Defense Development), Jun Gab Song, Son Seong-Hyun (IAE)

A Study on the Jump Error Smoothing Scheme by Fuzzy Logic .................................................................................................................. 1723
Lee Tae-Gyoo and KIM Kwangjin (ADD)

Performance Analysis on GPS RAIM in the Post SA Era .................................................................................................................. 1727
Choi Jae Won, Lee Jang Gyu (Seoul National Univ.), Park Chan Gook (Kwangwoon Univ.) and Jee Gyu-In (Konkook Univ.)

A Study on The Attitude Stabilization Techniques of Leo Satellites .................................................................................................................. 1731
Lho Young Hwan and Jung Kang Yong (Woosong Univ.)

A Study on Flight Data Analysis & Animation System Development .................................................................................................................. 1735
Kim JaeHyung and Shin SungSilk (Korean Air)

D-TP01: Internet-Based Control

Congestion Control in ATM Networks Using Mixed-LQR .................................................................................................................. 1739
Song Hae Seok, Seo Young Bong and Choi Jae Weon (Pusan National Univ.)

Token with Timer Algorithm for Guaranteeing Periodic Communication Service in Timed Token Protocol Networks .................................................................................................................. 1743
Choo Young-Yeol (POSCO) and Cheeha Kim (POSTECH)

Design of Remote Decentralization Embedded System supporting the Internet and CAN .................................................................................................................. 1747
Hyunsuk Lee, Jaenam Lim, Jaeyoung Ko, Jinwoo Park and Jangmyung Lee (Pusan National Univ.)

Development of Monitoring System for Polishing Robot Based on Web .................................................................................................................. 1752
Hong Chang-Woo, and Lee Min Cheol (Pusan National Univ.), Go Seok Jo (Dongi Univ.)

A Design of Web based GEM Using Single Object Access Protocol .................................................................................................................. 1756
Kang W.Joon and Park H. Seong (Kangwon National Univ.)

Implementation of a Time Triggered Communication Protocol .................................................................................................................. 1760
Kim Jaewoo, Kim Keewoong, Kim Taeyol, Lim Hongjoon, Ryu Syehyung and Lee Suk (Pusan National University)

Practical Treatment of Path-Delay Error by Terrain Model in Mobile Wireless Location .................................................................................................................. 1764
Kim Wuk, Lee Jang Gyu (Seoul National Univ.) and Jee Gyu In (Konkuk Univ.)

D-TP02: Robot Systems 2

Simulation of Detecting the Distributed Denial of Service by Multi-Agent .................................................................................................................. 1768
Seo Hee Suk and Lee Young Won (Sungkyunkwan Univ.)

Evolvable Co-operation Strategy for Interactive Robot Soccer with Genetic Programming .................................................................................................................. 1772
Kim Hyounge-Rock, Hwang Jung-Hoon and Kwon Dong-Soo (KAIST)

Mobility Analysis of Planar Mobile Robots and The Rough-Terrain Mobile Robot via The Screw .................................................................................................................. 1776
Kim Whee-Kuk, Yi Byung-Ju and Lee Seung-Eun (Korea Univ.)

Wireless Interface of Motion between Human and Robot .................................................................................................................. 1780
Jung Seul, Jeon Poongwoo, Cho Hyun Taek, Jang Pyungsoo, Cho Kiho, Kim Jeonggu, Song Duckhee and Choi Youngkwan (Chungnam National Univ.)

Multi-robot control using Petri-net .................................................................................................................................................. 1784
A Mobile Robot Navigation Method using Virtual Obstacle in Indoor Environment

D-TP03 : Factory Automation and CIM 2

Optimal Period and Priority Assignment Using Task & Message-based Scheduling in Distributed Control Systems
Kim Hyoung Yuk and Park Hong Seong (Kangwon National Univ.)

A Development for Web-Based Name-Plate Production System by Using Image Processing
Cho Jin Youn and Kim Gibom (SNU)

Development of an Extended EDS Algorithm for CAN-based Real-Time System
Lee Byong Hoon, Kim Dae Won and Kim Hong Ryul (Myongji Univ.)

EIT Image Reconstruction using Genetic Algorithm
Kim Hochan, Moon Dongchun, Kim Minchan and Lee Yoonjoon (Cheju National Univ.)

The Relay Circuit to EMFG Conversion with a Box's Characteristic Equation
Paek Hyung-Goo and Yeo Jeong-Mo (Pukyong National University)

D-TP04 : Sensors and Measurements 2

An Efficient Ambiguity Searching Method with Constraints for Attitude Finding GPS Receivers
Nam Sung Il, Son Seok Bo, Park Chan Sik and Lee Sang Jeong (Chungnam National Univ.)

Development of a Real-time Initial Alignment Algorithm for SDINS using the Kalman filter
Oh Sang Heon, Hwang Dong-Hwan and Lee Sang Jeong (Chungnam National University)

Neural Network Algorithm for VOC Gas Recognition and Concentration Estimation at Field Screen Using E-Nose
Kim Jeong-Do, Byun Hyung-gi, Ham Yu-Kyung, Lee Jun-Sub (Samchok Univ.) Shon Won-Ryu, Heo Nam-Up (Zenis Tech.,)

Distributed Flexible Tactile Sensor System Using Piezoelectric Film
Yoon Myoung Jong, Yu Kee Ho, Kwon Tae Gyu, Lee Seong-Cheol (Chonbuk National Univ.)

Enhancement of Tracking Performance of Laser Tracking System for Measuring Position Accuracy of Robots
Hwang Sung-Ho, Choi Gyeong-Rak, Lee Ho-Gil, Shon Woong-Hee and Kim Jin-Young (KITECH)

Development of the Motion Characteristics Analysis System of Robots
Ahn Chang-Hyun, Kim Jin-oh (Kwangwoon Univ) and Kim Gyu-ro (Ministry of Commerce, Industry and Energy)

D-TP05 : Control Theory 2

Performance Tuning Method of Inverse Optimal PID Control for Mechanical Systems
Choi Youngjin, Chung Wan Kyun and Youn Youngil (POSTECH)

Design of Stable Time-varying Sliding Mode System
Kim Ga-Gue, Ma Jin-Suk, Lim Chae-Deok (ETRI) Choi Bong-Yeol (Kyungbook National Univ.)

Predictive Spacecraft Attitude Control under External Disturbances
Myung Hyun-Sam, Oh Choong-Suk, Bang Hyo-Choong and Tahk Min-Jea (KAIST)

Delay-dependent Guaranteed Cost Control for Uncertain Time Delay System
Ohmin Kwon, Sangchul Won (POSTECH) Dong Yue (China University of Mining and Technology)

A Novel Controller Design Method for Time-Delay System with the Integral Mode
Ma Jin Suk, Kim Sun Ja, Kim Ga Gyu, Lee Hyung Suk (ETRI) and Kwon Woo Hyen (Kyungbook

2001. 10. 17~21, Cheju National University, Jeju, Korea

ICCAS 2001
D–TP06 : Computer Vision and Image Processing 2

A Study on the Camera Calibration Algorithm using Perspective Ratio of Difference Line Widths 1861
Jeong Jun-Ik, Song Suck-Woo, Lee Ho-Soon and Rho Do-Hwan (Chonbuk Nat. Univ.)

A Study on the Distance Measurement Algorithm using Feature–Based Matching for Autonomous Navigation .............................................................. 1865
Song Hyun-Sung, Lee Ho-Soon, Jeong Jun-Ik, Son Kyung-Hee and Rho Do-Hwan (Chonbuk National Univ.)

A Volume Reconstruction Algorithm and a Coordinate Calibration of an X-ray Three Dimensional Imaging System .............................................................. 1869
Roh Young Jun, Cho Hyung Suck (KAIST), Jeon Hyoung Jo, Kim Hyeong Cheol (Samsung Electronics Co.)

6 DOF Pose Estimation of Polyhedral Objects Based on Geometric Features in X-ray Images. ...... .............................................................. 1873
Kim Jae Wan, Roh Young Jun, Cho Hyung S. (KAIST), Jeon Hyoung Jo, Kim Hyeong Cheol (Samsung Electronics Co.)

D–TP07 : Aerospace Technology 2

Gravity Modeling and Validation for High Accuracy Navigation Computation ................................. 1887

Design of a 3DOF Motion Capture System for HMD Using Micro Gyroscopes ................................. 1891
Song Jin Woo, Chung Hakyong, Park Chan Gook, Kang Taesam (Micro Infinity), Lee Jang Gyu, Park Kyucheol (Seoul National Univ.)

Improvement of Active Homing Performance with Radome Slope Estimation in Spatial Engagements ............................................................................ 1895
Shin Sang-Jin and Song Taek-Lyuil(Hanyang University)

UTV Localization from Fusion of Dead–Reckoning and LBL System .................................................. 1899
Jeon Sang-Woon, Jung Sul, Won Moon–Cheol (Chungnam National Univ.) Hong Sup, Choi Jong–Su (KRISO, KORDI)

A Study on the GPS Error Compensation using Estimation Point of Moving Position at a Vehicle ............................................................................ 1904
Song–Suck–Woo, Song Hyun–Sung, Jang Hong–Seok and Rho Do–Hwan (Chonbuk National Univ.)

D–TE02 : Control Virtual Manufacturing

A Study of 3-Dimension Graphic Monitoring System for Spent Fuel Dismantling Process ........ 1908
Kim Sung–Hyun, Song Tae–Gil, Lee Jong–Youl and Yoon Ji–Sup(Korea Atomic Energy Research Institute)

A Study on the Application of Virtual Manufacturing Technology for a Virtual Automotive Plant 1912
Sohn Chang Young, Noh Sang Do, Hahn Hyeung Sang, Lee Chang Ho, Hong Sung Won and Kim Duck Young(IAE)

Improvement of Mass Flow and Thickness Accuracy in Hot Strip Finishing Mill .......................... 1916
Hong Sung C. (POSCO)
Double sheet detection system for feeder robots in automation line ........................................... 1920
Kim Dae-Nyeon, Jo Kang-Hyun, Kim Tae-Ho, Kang Hyun-Duk, Yoon Yeon-Hong, Kim Se-Yoon
(Univ. of Ulsan), Shin In-Seung, Kim Ki-Su, Lee Seung-Choon (Daeyoung Industry)
Optimal Supervisory Control for Multiple-Modelled Discrete Event Systems ................................. 1924
Lee Moon-Sang and Lim Jong-Tae(KAIST)
Hierarchical Decentralized Supervisory Control of Discrete Event Systems .............................. 1928
Kim Seong Gyu and Lim Jong-Tae (KAIST)

D–TE03 : Monitoring and Control

Development of Precise Deflection Measurement System for Civil Structures and its Application
.................................................................................................................................................. 1931
Shin Seung Mok, Kim Sang Bong, Jeon Yang Bae (Pukyong National University), Kim Choong Sik,
Yoon Soo Ho (KICT)
Development of Low Price Digital Endoscope with Database System ......................................... 1935
Kim Sang Bong, Lee Young Whan, Kim Sung Wook, Kim Suk Yoel and Jeong Nam Soo (Pukyong
National University)
Nonlinear adaptive control of fermentation process ....................................................................... 1939
Sang Bong Kim, Hak Kyeong Kim, Jeong Nam Soo (Pukyong National University), Tan Tien Nguyen
(Hochiminh City Univ. of Technology)
A Study on the Introduction of Warehouse Type CY in Container Terminal ................................. 1943
Kim Hwan-Seong, Ryu Ki-Suck, Kim Sung-Hun, Hong Su-Sik and Chu Bong-Sung (Korea Maritime
Univ.)
Allocation Model of Container Yard for Effectiveness of ATC Work in Automated Container Terminal
.................................................................................................................................................. 1947
Kim Hwan-Seong, Lee Sang-Hun, Kwak Kyu-Seok (Korea Maritime Univ.), You Myong-Suk (Total
softbank)
Development of an Unmanned Control System of Induction Generator for a Wave Power Plant .... 1951
Jeon Bong-Hwan, Yong-Kon Lim and Seok-Won Hong(KRISO, KORDI)

D–TE04 : Robust Control Theory

Robust and Non–fragile $H_\infty$ Output Feedback Controller Design ............................................ 1955
Cho Sang Hyun, Kim Ki Tae and Park Hong Bae (Kyungpook National University)
$H_\infty$ Controller Design for Input–Saturated Linear Systems ......................................................... 1959
Choi Ki Hoon and Park Hong Bae(Kyungpook National University)
State–Feedback Guaranteed–Cost Controllers for Systems with Controller Gain Variation ........ 1963
Park Sung-Wook and Oh Jun–Ho(KAIST)
The Design of the Robust Hybrid Controller for the Construction Using an Active Dynamic Vibration
Absorber ......................................................................................................................................... 1967
Lee Sangkyu, Lee Jin Ho and Hwang I Cheol(Dongeui Univ.)
Robust ILQ Controller Design of Hot Strip Mill Looper System .................................................... 1971
Seong Bae Kim and I Cheol Hwang(Dong–Eui Univ.)
D-TE05 : Image Processing and Estimation

Design of Control System for Circular Knitting Machine with Tension Control Capability ........ 1975
Yeo Hee-Joo, Kim Jae Won, Kim Byoung Ho(Daejin Univ.)

De-correlated Compression Filter Based on Time-Propagated Measurement Fusion .............. 1979
Lee Hyung-Keun, Lee Jang-Gyu, Lee Gyu-In and Park Chan Gook(Seoul National Univ.)

Using a Disturbance Observer for Eccentricity Compensation in Optical storage systems ...... 1983
Kyung-Soo Kim, Pyo Hong Seong, Yong-Hee Han and Heuigi Son(LG Electronics, Inc.)

A Study on a Control Algorithm and Determinant of an Optimal Process Condition Based Upon ESR
Process Analysis. ...................................................................................................................... 1987
Lim Sung-Hyun, Boo Kwang-Suck, Lim Tae-Gyoon and Wi Chul-Min (Inje Univ)

State-Space Model Based On-Line Parameter Estimation for Time-Delay Systems .............. 1991
Choi Young Woo (Seoul National University)

D-TE06 : Information Processing Systems

Performance Improvement of Active Queue Management for Internet Routers ....................... 1995
Lim Hyuk, Park Kyung-Joon, Park Eun-Chan and Choi Chong-Ho (Seoul National Univ.)

Implementation of Simple and Intelligent Slave ASIC for Profibus-DP ................................. 1999
Kwon Daehyun, Bae Gyu-Sung, Lee Youngjoon, Lim Kye-Young, Moon Jeong-Il and Kim Jong-
Bae(LG Industrial Systems Co.)

Design of An Extended Robust H∞Filter ............................................................................. 2003
Yu Myeong-Jong, Lee Jang-Gyu and Park Chan Gook (Seoul National University)

Fruit Classification System with a Color Image Boundary Tracking ....................................... 2007
Choi Youn-Ho, Choi Byeong Tae, Lee Moo Young, Im Sung Woon and Kwon Woo Hyen(Kyungpook
National University)

Tracking Control of a Moving Target Using a Robot Vision System ....................................... 2011
Kim Dong-Hwan and Cheon Gung-Il(SNU)

Control of Helicopter Training Simulator by Self Tuning Control Method ............................. 2015
Kim Sang Bong, Ahn Hwi Ung, Lee Gun You, Park Soon Sil and Oh Se a june(Pukyong National
University)

D-FA01 : Control Device Smart Actuators

Robust Speed Control of PMSM with Fuzzy Gain Scheduling ............................................. 2019
Won Tae-Hyun, Kim Mun-Soo(Dongeui Institute of Technology), Park Han-Woong(Korea Naval
Academy) and Lee Man Hyung(Pusan National Univ.)

Fine Gap Control System Design Using Pneumatics servo System ...................................... 2023
Kim Dong-Hwan, Kim Young-Jin(SNU) and Jeong Dae-Hwa(LGE Co.)

FPGA Based Micro Step Motor Driver ................................................................................. 2027
Cho Jung Uk and Jeon Jae Wook(SungKyunKwan University)

Adaptively Tuned Dynamic Absorber ..................................................................................... 2031
Kim Taehyun, Park Youngjin and Kim Heunggi (KAIST)

Development of a High-Preformance Controller for Laser Marking System Using Galvanometer ..... 2035
Bang Seoung Hyun, Hong Sun-Gil(Hoseo University) and Kang Tae-Sam(Konkuk Univ.)

A Study on The Vibration Attenuation of a Driver Seat Using an MR fluid Damper .................. 2039
Park Chanho, Ahn Byeongil and Jeon Doyoung(Sogang University)

A Study on the Modelling and Control Method of an Anti-lock Brake System ..................... 2043
Lim Chul-ki, Song Jeong-Hoon and Boo Kwang-Suck(Inje University)

2001. 10. 17~21, Cheju National University, Jeju, Korea

ICCAS 2001
D-FA02 : Robot Control

A Robust Control with The Bound Function of Neural Network Structure for Robot Manipulator
.................................................................2047
Ha In Chul and Han Myung Chul(Pusan National Univ.)

Development of A Robot Off–Line Programming System with Collision Detection ..............2051
Lee Sang Cheol and Lee Kwae Hi(Sogang University)

VHDL Module Implementation of High-speed Wireless Modem using Direct Sequence Spread
Spectrum Communication Method .............................................................. .....................2055
Lee JungHa and Kim IlHwan(Kangwon National University.)

Performance Evaluation of Maritime GPS Attitude Finding Receiver .........................2059
Choi Byungmoom, Lee Heon and Park Chansik (Chungbuk National University)

Robust Control Design for Robots with Flexible Joint and Link.............................. 2063
Jung Eui Jin, Ha In Chul, Kim Chang Gyul and Han Myung Chul(Pusan National Univ.)

D-FA03 : Aerospace Technologies–GPS

Analysis of Success Rate of GPS Carrier Phase Ambiguity Resolution in Korea Peninsula ......2067
Son Ji soo and Jee Gyu-In(Konkuk Univ.)

GPS to Monitor and Track Vehicle Position in Steel Works ................................................2071
Park Cheol No and Jee Gyu-In(Konkuk Univ.)

Study and Implementation on Compensation of Step Jump Errors and Integrated Filter in the
INS/GPS System ............................................................................................................2075
Hong WoonSeon, Choi SangWook and Park HeungWon(ADD), Kim ChenJung(KARI)

Implementation of Network–Assisted Software GPS Receiver based on PC for Snapshot Navigation
Solution ........................................................................................................................2079
Kim Whi, Hong JinSeok, Kim SangHyun, Jee Gyu-In (Konkuk Univ.) and Park ChanGook
(Kwangwoon Univ.)

Development of WNS/GPS System Using Tightly Coupled Method .............................. 2084
Cho Seong Yun, Park Chan Gook(Kwangwoon University), Jee Gyu In and Lee Young Jea(Konkuk
University)

Development for Low Power GPS Receiver .............................................................. .......2088
Kim Il Kyu, Lee Jae Ho, Seo Hung Serk, Park Chan Sik and Lee Sang Jeong(Chungnam National
University)

D-FA04 : Intelligent System 1

A Self–Recognition Algorithm based Biological Immune System .......................................2092
Kwee-Bo Sim, Dong-Wook Lee, Sang-Joon Sun and Jae-Yoon Shim(Chung-Ang University)

A Study on Automatic Design of Artificial Neural Networks using Cellular Techniques and
Implementation ..............................................................................................................2096
Kwee-Bo Sim, Dong-Wook Lee, Chang-Bong Ban and Sang-Young Kwak(Chung-Ang University)

The Traffic Sign Classification by using Associative Memory in Cellular Neural Networks 2100
Shin Yoon-Cheol, Jo Deok-Yeon and Kang Hoon(Chung-Ang University)

Recognize Vowel using Self Organizing Map .................................................................2104
Jang Sungwhan, Lee Jayong and Kang Hoon(Chung-Ang University)

A Feasibility Study on Application of Immune Network for Intelligent Controller of a Multivariable
System ........................................................................................................................2108
Dong Hwa Kim(Hanbat National Univ.)
D-FA05 : Fault Diagnosis

Fault Diagnosis for Electric Chassis System .............................................................. 2114
Ryu Seongpil, Kwak Byunghak, Park Youngjin(KAIST) and Jung Hunsang(Mando Corps.)
Design and Operation of 3MW Pilot Plant of Mg(OH)2 Flue Gas Desulfurization Process .... 2118
Kim In-Won, Jin Sang-Hwa( Konkuk University), Choi Byung-Moon(Kyunggi Chemicals) and Lee
Hyung Keun(KIER)
Diagnosis of Thickness Quality Using Multivariate Statistical Analysis in Hot Finishing Mill ...... 2122
Kim Heung Mook(POSCO)
Robust Analysis for Redundant Configuration of Inertial Sensors ......................................... 2126
Yang Cheol Kwan, Kim Jeong Yong and Shim Duk-Sun(Chung-Ang University)
Optimal IMU Configurations for a SDINS ................................................................. 2130
Kim Kwang-Hoon, Lee Jang-Gyu(Seoul National University), Shim Duk-Sun(Chung-Ang Univ.)
and Park Chan-Gook(Kwangwoon Univ.)

D-FA06 : Virtual Reality

A Motion Editing System for Handling Autonomous Creation of Character Animation .............. 2134
Lee Jihong and Kim Insik(Chungnam National University)
A Study on Multichannel 3D Sound Rendering .............................................................. 2138
Kim Sunmin and Park Youngjin(KAIST)
A Method for Creating Natural Animation by Interaction with Operaors ................................ 2142
Lee jihong and Kim sungsu(Chungnam National University)
3D Avatar’s Movement Creation and Control Technique ...................................................... 2146
Jang Moon Sung, Kuc TaeYong and Kim Si Jung(SungKyunKwan University)
Experimental Planning for Realistic Force Feedback in a Bicycle Simulator ....................... 2150
Yang Gi-Hun and Kwon Dong-Soo(KAIST)

D-FA07 : Computer Vision and Image Processing 3

The Study of Method for Diagnosis of Transformers Trouble .............................................. 2154
Song Jae Tae, Jeong Seung Cheol, Choi Hyun Seob and Park Poo Gyeon(POSTECH)
Development of a Precision Distance Sensor by Using One-dimensional CCD ..................... 2158
Jang Se-Jung, Boo Kwang-Suck, Lim Sung-Hyun and Lee Seung-Young (Inje Univ.)
Development of an Inspection System of Contact Light Emitting Device for Quality Control .... 2162
Lee Jun Ho, Kwon Hyong Kee and Ryu Young Kee (Sunmoon University)
Inspection System of Welding Bead and Chamfer by means of Laser Vision ....................... 2166
Lee Junsok, Im Pilju, Park Youngsun and Kim Jaehoon (Samsung Heavy Industries)
An Automatic Inspection of the Surface Outlook of High Speed Moving Plate by Using One
Dimensional CCD Camera ............................................................................................... 2170
Lim Sung-Hyun and Boo kwang-Suck(Inje University)

D-FP01 : Remote Sensing and Control

Impedance Control for Haptic Interface Using Parameter Estimation Algorithm ...................... 2174
Park Heon, Lee Sang-Chul, Lee Soo-Sung and Lee Jang-Myung(Pusan National University)
A Study About Embodying an AMR Based on Power Line Communication. ............................ 2179
Yoon Gun and Park Hong Seong(Kangwon National University)

Analysis of Response Characteristics of the CAN–Based Feedback Control System Considering the
Network Delay Time ............................................................................................................... 2183
Jeon Jong Man and Kim Dae Won (MyongJi Univ.)

Implementation of AMR system using PowerLine Communication ..................................... 2187
Park ByoungSeok, Hyun DuckHwa, Jang MunJeong, Lim YoungHoon and Cho Sungu (KEPRI)

D–FP02 : Mobile Robot 1

Safe and Reliable Intelligent Wheelchair Robot with Human Robot Interaction ...................... 2191
Moon In–Hyuk, Joong Sang–Hyun and Kim Young–Kwang (Yonsei University)

Manipulabilty Ellipsoids of Wheeled Mobile Manipulators .................................................... 2195
Kim Sungbok and Lee Jaeyoung (Hankuk Univ. of Foreign Studies)

Path Planning for Cleaning Robots: A Graph Model Approach .......................................... 2199
Yun Sanghoon, Park Sehun, Choi Byungjun and Lee Yun–Jung (Kyungpook National Univ.)

Real Time Trajectory Control for Two Wheeled Mobile Robot Under Dynamic Environments .. 2203
Lee Jin–Woo (Samsung Heavy Industries)

Obstacle Avoidance and Trap Recovery of Mobile Robot. ................................................... 2207
Hwang Kyung–hun, Lim Kyung–su and Kuc Tae–yong (SungKyungKwan University)

D–FP03 : Computer Control

Adaptive Nonlinear RED Algorithm for TCP Congestion Control ............................................ 2211
Park Kyung–Joon, Park Eun–Chan, Lim Hyuk and Choi Chong–Ho (Seoul National univ.)

A Study on the Tip Position Control of Flexible Beam by Linear Matrix Inequality ..................... 2215
Kim Chang Hwa(Kyungnam College of Information & Technology), Chu Man Suk(Dongseo Univ.)
and Yang Joo Ho(Pukyong National Univ.)

Design of Multi–mode Tracking Algorithm for DBS Receiving Antenna on Shipboard .......... 2219
Choi Choel, Kim Youngho and Lee Sungjin (Pusan Natl. Univ.)

A Study on Roll Eccentricity Detection in Hot Strip Mill ......................................................... 2223
CHOI IL SEOP, CHOI SEUNG GAP, JEON JONG HAG, HONG SEONG CHEOL and PARK CHEOL JAE (POSCO)

The Development of Coating Weight Model and Control Logics in Continuous Galvanizing Line
.................................................................................................................................................. 2226
Chae Hong kook and Shin Ki Tae (RIST)

A Study of Robust Vibration Control System for Multi–layer Structure with Modeling Errors .... 2230
Kim Young Wan, Lee Ki Dong, Yang Joo Ho(Pukyong National University)
and Kim Chang Hwa(Kyungnam College of Information & Technology)

A study on the Development of an Embedded PC–based Electronic White Board Control System
.................................................................................................................................................. 2234
Lee Jung–Min and Seo Chang–Jun (Inje Univ.)

D–FP04 : Intelligent System 2

3D Map Building of the Mobile Robot Using Structured Light ................................................. 2238
Lee Oonkyu, Kim Minyoung, Cho Hyungsoo(KAIST) and Kim Jaehoon(Samsung Heavy Industries)

The Determination of Coagulant Feeding Rate in the Water Treatment Plant ......................... 2242
Kim Yongyeol, Jung Hyung–Tae, Jang Gil–Soo and Park Chul–Hong(KOWACO) and Kang E–Sok
(Chungnam National Univ.)
Force control of the NFBC compactor using Fuzzy algorithm .............................................. 2246
Yoon Ji Sup(KAERI), Kim Young–hwan, Song Sang Ho and Kang E–sokChungnam National Univ.

Walking robot with 4 legs ................................................................................................2250
Jang Sung-hwan, Lee Jayong and Kang Hoon(Chung–Ang University)

On–line Tuning of AGC gain in Hot Strip Mill Using Adaptive Neurofuzzy Networks ............... 2254
Jung Youngran, Lee Dong Hoon, Won Sangchul and Hong Sungchul(POSTECH)

D–FP05 : Process Control and Automation 1.

Comparison of Titration Curve Estimation Methods for pH Neutralization Processes ..............2258
Park Ho Cheol and Lee Jietae (Kyungpook National Univ.)
A Remote Monitoring and Control System for Waste water Treatment Facility via Public
Communication Network. .................................................................................................2262
Jung Jae Hak and Choi Jin–Young (Yeungnam Univ.)

System Identification of the Hammerstein Processes for Automatic Tuning of PID Controller Using
Relay Feedback .............................................................................................................2266
Koo Doe Gyoon, Youn Jung Hoon, Lee Jietae(Kyungpook National Univ.) and Sung Su Whan(KAIST)
A Study On the EMFG Representation of the Relay Circuits and Ladder Diagram ............... 2270
Kim Hee–Jung, Paek Hyung–Goo and Yeo Jeong–Mo (Pykyong National University)

D–FP06 : Aerospace– Control 1

Stabilizing Controller Design for Linear Time–Varying Systems Using Ackerman–like Formula .. 2274
Choi Jae Weon and Lee Ho Chul (Pusan National University)
Trajectory Optimization in Consideration of Inertial Navigation Errors .................................. 2278
Design of Neural Network Adaptive Control Law for Aircraft System Including Uncertainty ....2282
Kim Youdan and Shin Dongho (Seoul National University)
Model Reference Adaptive Control of Systems with Actuator Failures through Fault Diagnosis . 2286
Choi Jae–Weon and Lee Seung–Woo (Pusan National University)
Design of Augmented Guidance Law Considering Geometric Pursuit Angle ....................... 2290
Kim Youdan, Kim Ki–Seok and Moon Gwan–Young (Seoul National University)

D–FP07 : Computer Vision and Image Processing 4

Mobile Robot Navigation in Indoor Environments using Object Recognition ..........................2294
Lee Won Hee, Park Min Gyu, Lee Min Cheul (Pusan National Univ.) and Kim Dong Soo(KIMM)
The measurement of stewart platform applied to the tele–oprated vehicle system by forward
kinematics .......................................................... ......................................................2298

Navigation of a mobile robot using the hand gesture recognition ................................... 2302
University)
Development of Realtime Integrated Monitoring System in Product lines and Its Application ... 2307
Kim Sang Bong, Kim Suk Yoel, Park Soong Jea, Lee Young Hwan (Pukyong National University) and
Kim Soung Min (KPS Co.)
D-FE02 : Mobile Robot 2

**Development of a Guide Robot with Real-Time Linux OS** .................................................... 2311
Mun Hak-Jun, Seo Yeon-Gon and Kim Jin-Oh (Kwangwoon National Univ.)

**Development of Intelligent Mobile Robot with electronic nose** ........................................... 2315
Hyung-Gi Byun, Yu-Kyung Ham, Jung-Do Kim, (Samchok Univ.), Ji-Hyeok Choi(Sungkyunkwan Univ.) and Won-Ryu Shon

**On the ZMP of biped robot (Visualization of ZMP)** ............................................................ 2319
Sung Sang-Hak, Youngil Youm and Wan Kyun Chung (POSTECH)

**The design and actuator sizing for redundantly actuated omni-directional mobile robot** .......... 2323
Tae-Bum Park, Jae-Hoon Yi, Byung-Ju Yi(Hanyang Univ.), Whea-Kuk Kim(Korea Univ.) Bum-Jae Yu, Sang-Rok Oh(KIST)

**Reliability Analysis of Underwater Mobile Robot for Automated Reactor Inspection using Bayesian Belief Nets** .................................................................2327
Eom Heung Seop and Kim Jae Hee (KAERI)

D-FE06 : Aerospace-Control 2

The Study of Gain Scheduled PD-like Fuzzy Logic Control: Application to High Maneuverable Aircraft .........................................................................................................................2387
Hong Sung-Kyung and Lee Jung-Young(Sejong-Lockheed Martin Aerospace Research Center)

Biased PNG for Approximate Target Adaptive Guidance ..........................................................2391
Song chanho, Kim philsung and Jun byungeul (ADD)

Design of the Autopilot Algorithm for Unmanned Aerial Vehicle and its Flight Test ............... 2395
Hong Sung-Kyung and Wee Jung-Hyun(Sejong-Lockheed Martin Aerospace Research Center)

Real-time Aircraft Parameter Estimation using LWR ...............................................................2400
Song Yongkyu(Hankuk Aviation Univ.)

Error analysis of the navigation system integrating attitude GPS and low-cost INS .................. 2404
Lee Jae Ho, Seo Hungserk, Sung Tae Kyung and Lee Sang Jeong (Chungnam National Univ.)

Accelerometer Mixed Algorithm Using Fuzzy Technique ...................................................... 2408
Jin Yong, Cho SungYun and Park Chan Gook(Kwangwoon University)

D-SA01 : Intelligent System 3

Identification and Control of Electro-Hydraulic Servo System with DDV ............................... 2412
Kim Seung Hyun, Lee Chang Don and Lee Jin Kul (Pusan National Univ.) and Lee Sang Hoon(Hyundai Heavy Industries)

Implementation of Face Recognition System using Neural Network. .................................... 2416
Jung Hun-qi and Kuc Tae-yong(SungKyunKwan Univ.)

Takagi-Sugeno Fuzzy Model-based Iterative Learning Control Systems: A Two-dimensional System Theory Approach .......................................................... .............................................2420
Chu Jun Uk and Lee Yun Jung(Kyungpook National University)

Performance Comparison of CEALM and NPSOL .................................................................. 2424
Hong Young-Seok and Tath Min-Jea(KAIST)

Development of a Neural Network for Optimization and Its Application to Travelling Salesman Problems ........................................................................................................ 2428
Hong Dae Sun, Ahn Byoung Jae, Chung Won Jee(Channgwon National University) and Cho Hyung Suck(KAIST)
D-SA02 : Process Control and Automation 3

Model Identification of Hydraulic Pin-On-Disk type Tribotester with DDV ................................. 2432
Kim Seung Hyun, Lee Chang Don and Lee Jin Kul (Pusan National Univ.)

3 Dimensional Modeling and Sensitivity Analysis for Vibration Reduction of the Spin–Coater System
..................................................................................................................................................... 2436
Ryu Incheol, Chae Hochol, Han Changsoo (Hanyang University) and Jang Jinhee (Daewoo Motors)

A Study of Slip Ratio Control of 3port–2position Solenoid Valve using PWM Control ............... 2441
Kim Jung–Hwan, Choi Jong–Hwan and Lee Jin–Kul (Pusan National Univ.)

Design of Satellite System for the Back-up System of Unmanned Control Plant .................. 2445
Kee–Heon Chung, Young–Hwan Yoon, Doo–Gyoon Byon (Korea Water Resources Corporation)

Development of Internet–based Collaborative Design System .............................. 2449
Baek Dong Seok (Cubic Tech), Han Young–Geun (Myungji Univ.), Kim Gibom (SNU), Kong Sang Hoon and Lee Kyo Il (Automatic Control Research Center – SNU)

D-SA03 : Man–Machine Systems

Haptic Experimentation for Single Degree of Freedom Force Output Joystick using Hybrid Motor/Brake Actuator .............................................................. ....................................... 2453
Jinung An and Dong–Soo Kwon (KAIST)

Force Control of a Walking Training Robot Arm .............................................................. ...2457
Shin Hocheol and Kim Seungho (Korea Atomic Energy Research Institute)

The force feedback method for Master/Slave–Combined system ........................................ 2461
Ko Seong Young and Kwon Dong–Soo (KAIST)

Human Robot Interaction using Face Direction Gesture ...................................................... 2465
Joung Sanghyun and Moon Inhyuk (Yonsei University)

Vision–Based Real–Time Motion Capture System ............................................................... 2469

D-SA04 : Nonlinear Control Theory

On Stability of Discrete Time Nonlinear Systems with Slow–in–the–average Time–Varying Inputs .... 2473
Y. S. Shin, J. T. Lim (KAIST)

A new nonlinear feedback controller eventually converges to SDRE based optimal controller . 2477
Sang–Bin Yim, Jun–Ho Oh (KAIST)

Dynamic Feedback Linearization of Nonlinear Discrete–Time Systems with 2 Inputs .......... 2481
Cho Hyung–Joon, Ryu Dong–Young, Park Se–Yeon Lee Hong–Gi (Chung–Ang Univ.) and Kim Yong–Min (Choochung Univ.)

Design of Generalized Predictive Controller for Chaotic Nonlinear Systems Using Fuzzy Neural Networks .............................................................. ........................................ 2485
Jong–tae Choi, Jin–bae Park (Yonsei Univ.) and Yoon–ho Choi (Kyounggi Univ.)

Target Motion Analysis for Active/Passive Mixed–Mode Sonar Systems ............................. 2489
Lim Young Taek and Song Taek Lyul (Hanyang University)

Fuzzy system and Knowledge Information for Stock–Index Prediction ............................... 2493
Kim Hae–Gyun, Bae Hyeon and Kim Sung–Shin (Pusan National University)
D-SA05 : Computer Vision/Control

Robot posture estimation using inner-pipe image .............................................................. 2497  
Yoon Ji Sup(Korea Atomic Energy Research Institute) Kang E-sok(Chungnam National University)  
Internet-Based Measuring/Monitoring System that Measures Drifted Snow Using Visual Image  
Ko Deok Hyeon, Kim Moo Seong(Kyunghee University), Lee Soon Geul and Kim Jin hyung(Taemin Mech)

Stabilization of Attitude for Autonomous Bicycle System Using Sliding Mode Control  
Park Ingyu and Ham Woongchul(Chonbuk National University)  
Neural-Net Based Nonlinear Adaptive Control for AUV .....................................................2509  
Li Ji-Hong, Lee Sang-Jeong(Chungnam National University) Lee Pan-Mook(KRISO)  
Reinforcement Learning Algorithm Using Domain Knowledge ...................................... 2513

Modeling and Dynamic Characteristic Analysis of Continuously Variable Damper with Electro–Hydraulic Pressure Control Valve for Semi–Active Suspension System ....................................2533  
De Hong–Moon, Sohn Hyun–Chul and Hong Keum–Shik(Pusan National University)  
Web based remote controll system of reclaimer using wireless PDA .................................. 2537  
Lee Kwan Hee, Bae Hyo Jung(RIST)

D-SP02 : Process Control and Automation 4

Introduction of Automation and Control Issues for Hot Rolling Mill Processes .................. 2541  
Duk–Man Lee (POSCO)  
Development of The New Shape Control Algorithm with The Strip Thickness Decoplling in Hot Strip Mill .................................................................2545  
Dukbum Shin, Jongcheol Kim, Sangchul Won (GSIST, POSTECH)

The Control system development of Crop Cutting in Hot Strip Mill .................................... 2549  
Lee Sang–Ho, H.M. Bae(POSCO)

D-SP03 : Intelligent Control

A Fuzzy Control of a 3-dimensional Inverted Pendulum Using a Cartesian Robot ............... 2552  
Shin Ho Sun, Chu Jun Uk and Lee Yun Jung(Kyungpook National University)

2001. 10. 17~21, Cheju National University, Jeju, Korea  ICCAS 2001
Design of the Fuzzy Sliding Mode Controller and Neural Network Interpolator for UFV Depth Control

Kim Hyun-Sik (Agency for Defense Development) Park Jin-Hyun (Chinju National Univ.) Choi Young-Kiu (Pusan National Univ.)

A Consideration on Load Disturbance Characteristics of Realtime Adaptive Learning Controller based on an Evolutionary algorithms – Application to an Electro Hydraulic Servo System

Sung-Ouk, Jin-Kul Lee (Pusan National Univ.)

Study on Iterative Learning Controller with a Delayed Output Feedback

Hak-Sung Lee (Sejong Univ.)

H∞Fuzzy Dynamic Output Feedback Controller Design with Pole Placement Constraints

Jongcheol Kim, Sangchul Won (POSTECH)

D-SP04 : Aerospace Technology

Design of a reorganization and non-uniformity correction module for CCD pixels in MSC (Multispectral Camera)

Jon-Pil Kong, Sang-Soon Yong, Haeng Pal Heo, Young-Sun Kim Hong-Yul Paik (KARI)

Error Analysis of the Navigation System with Asynchronous Gyro Outputs

Kwang-Jin Kim, Tae-Gyoo Lee (Agency for Defense Development)

Design of In-Motion Alignment System using Robust Extended Kalman Filter

Hong Hyun Su, Lee Jang Gyu (Seoul National Univ.) Park Chan Gook (Kwangwoon Univ.)

Design of nonlinear fixed-interval smoothing filter and its application to SDINS

Yu Jaejong, Lee Jang Gyu, Hong Hyun Su (Seoul National Univ.) Han Hyung Seok (Kwangwoon Univ.) Park Chan Gook (Kwangwoon Univ.)

D-TMP : Domestic Poster Session

The Fuzzy Fault Diagnosis System for Induction Motor

Byung Yeun-Sub, Jang Dong-Uk Hyundai-Jun (KRRI)

Compensation Logics of Controller in Korean Standard Super Critical Once Through Boiler

Eun Gee Kim (Tangjin Power Plant in Korea East West Power Company)

Development of a High Power Ultrasonic Transducer for Steel Pickling Process

Son Boongho (POSCO) Roh Yongrae (Kyungpook National Univ.)

The Effect Analysis for Rain Attenuation of VSAT

Hong Sung-Tak, Shin Gang-Wook (KOWACO)

A Study on The Slidacs Type Automatic Voltage Regulator Having The Improved Output Characteristics

Kim Sung-Do, Park Jung-Hoon, Hong Sung-Hoon, Kand Moon-Sung (Chongju Univ.)

A Study on the Effective Data Transmission for the Remote Monitoring And Control System Using TDM/TDMA

Shin Gang-Wook, Hong Sung-Tak (KOWACO)

A Study on TLS Position Decision System of Container Crane

Son Jeong-Ki (KPTI) Park Rae-Bang (Busan Polytechnic College) Kwon Soon-Jae (Pukyong National Univ.)

Development of the Centralized Monitoring and Control System for Absorption Chiller–heaters

Lee Ji-Hyung, Ryu Sang-Hun, Park In-Wan (Hyundai Heavy Industries)

Precision Position Control of Piezoactuator Using Inverse Hysteresis Model and PID Control

Kim jung yong, Lee byung ryong, Yang soon yong, Ahn kyung kwan (Univ. of Ulsan)

Desing of a Controller for Rod Balancing System
Kim Sang-Gyu, An Jung-Hun, Hong Sung-Hun, Kang Mun-Sung (Chongju Univ.)

A Fuzzy Sliding Mode Controller for Nonlinear Robot System ......................................................... 2627

Jeong-Joo Yun, Jang-Ku Kim, Cheol-Ki Ahn, Min-Cheul Lee (Pusan National Univ.)

The Study of Error Compensation for Repeatability Improvement of Precision Positioning System ...
................................................................................................................................... 2631

Woogeun Lee, ChangSoo Han, HyeunSeok Choi, KyeYoung Lee (Hanyang Univ.)

Robust Speed Controller of Induction Motor using Neural Network–based Self–Tuning Fuzzy PI–PD Controller ................................................................................................................................... 2636

Sang-Min Kim, Chung-Jin Kwon, Chang-Goo Lee, Sung-Joong Kim (Chonbuk National Univ.),
Woo-Youn Han (Chonju Univ.), Dong-Youn Shin (ChungNam Univ.)

Observer Based Sliding Mode Controller for Nonlinear System using Dynamic Rule Insertion ... 2640

Ho-Joon Seo, Dong-sik Kim (Chungnam University), Sam-Jun Seo (Anyang University), Jung-Hyun Park, Gwi-Tae Park (Korea Univ.)

The Vibration Control of Flexible Manipulator using A Reference Trajectory Command and Fuzzy Controller ................................................................................................................................... 2644

Yang-Su Park, Jeng-Ho Kang (Kyung Nam College), Yoon-Myung Park (Dong-A Univ.), Yong-Gab Cho (Moonkyung Univ.)

An Implementation of Mutual Tuning Controller for Position Control of Multiple Hydraulic Cylinders ...
................................................................................................................................... 2649

Jin-Gyu Kim, Jang-HO Park, Gi-Seok Ryu, Hyo-Sik Choi, Jong-ok Lim, Jong-Hwa Kim (Korea Maritime Univ.)

A State Space Analysis on the Stability of Periodic Orbit Predicted by Harmonic Balance .............. 2653

Sung Sangkyung, Lee-Jang Gyu (Seoul National Univ.), Kang Taeam (Konkuk Univ.)

Nonlinear Attitude Control of a Two–Wheeled Mobile Robot ................................................................. 2657

Ji-Won Yang, Chi-Won Roh, Kwang-Won Lee (Ajou Univ.)

Position Control of Linear Actuator with Time Delay Using the Smith Predictor ................................. 2661

Seung-Won Kang, Gi-sang Choi (UOS Univ.)

A Design of Nonlinear Time–varying Fuzzy PID Controller for Position Control System using Embedded–sensor–type Hydraulic Cylinder .................................................................................. 2665

Jang–Ho Park, Jin-Gyu Kim, Gi-Seok Ryu, Byung–Geur Lee, Jong–Hwa Kim (Korea Maritime Univ.)

Eigenstructure Assignment for a Looper Control System ........................................................................ 2669

Lee Dong Wook, Ahn Byoung Joon, Park Sung Han, Lee Man Hyung (Pusan National Univ.)

Implementation of Motion Controller Using Network ............................................................................ 2673

Kim Min Kyu, Kim Hyun Suk, Yoo Ho Sun, Oh Hak Seo, Sung Hak Kyung (Samsung Electronics Co. Ltd.)

Decentralized Controller Design for Nonlinear Systems using LPV Technique ................................. 2677

Sangmoon Lee, Sungsik Kim, Sangchul Won (POSTECH)

The Design of Width Controller by using Looper Tension Control of Finishing Mill in Hot Strip Mill ... 2681

Kyunghwan Kwon, Sangchul Won (POSTECH)

Estimation of Errors in Inertial Navigation Systems with GPS ............................................................... 2685

Chang Yu Shin, Ha Seong Ki, Kim Eun Joo, Hong Sin Pyo, Lee Man Hyung (Pusan National Univ.)

A Real–Time Control for a Dual Arm Robot Using Neural–Network with Dynamic Neurons ............ 2689

Kyun–Kyu Jeong, Sung–Hyun Han (Kyungnam Univ.), Young–Hee Jang (Pusan National Univ.),
Kang–Doo Lee (Chinho College), Kyung–Yean Kim (Koje University)

Design of Fuzzy–Neural Control Technique Using Automatic Cruise Control System of Mobile Robot ................................................................................................................................. 2693

Jong–Soo Kim, Jun–Hwa Jang, Jin Lee, Sung–Hyung Han (Kyungnam Univ.), Dunk–Ki Han
(ChonAng Machine), Yong–Kyu Kim (Univ. Stuttgart)

Development of an Estimation Simulator and Dynamic Modeling for Moving Capability of Track Vehicle ........................................................................................................................................... 2697

Dong–Yeon Jeong, Sung–Il Kim, Sung–Hyun Han (Kyungnam Univ.), Kyung–Sik Lee, Yong–Tae Kim (Tonil Heavy Industry)

Development of Preprocessor Program for Articulated Total Body .......................................................... 2701

Lee Dong Jea, Son Kwon, Jeon Kyunam (Pusan National Univ.), Choi Kyunghyun (Cheju National University)
The Program Development for Real-Time Monitoring And Control of RF Output .................................................. 2705
Gang-wook Shin, Sung-Tak Hong, Jae-Rheen Yang (KOWACO)

Effective Real Time Tracking System using Stereo Vision ................................................................................. 2709
Hyun-Jin Lee, Tae-Young Kuc (SungKyunKwan Univ.)

Research of Home Application Model for Implementation of Home Automation Server ................................. 2713
Kim Yu Chul, Kim Hye Sup, Lee Guhn Song, Cho Young Jo (I Controls)

Development of a Web Accelerator in the Kernel ................................................................................................. 2717
Park Jonggyu, Lim Hanna, Chang White and Kim Hagbae (Yonsei Univ.)

A Study on the Development of the Internet Live–Broadcasting Server System ................................................. 2721
Lee Sangmoon, Min Byungseok, Kim Hagbae (Yonsei Univ.), Kang Sinjun (ACS Technology)

Implementation of Internet Based Control by Developing LonWorks Intelligent Control Modules .......... 2725
W.P.Hong (Hanbat Univ.), W.G.Park (DCI.Co., LTD)

A Novel Design of the Distributed Fire Alarm Control System by Developing Intelligent Control Modules with LonTalk Protocol ................................................................. 2729
Won Pyo Hong, Sung Hoan Goo (Hanbat Univ.), Won Guk Park (DCI.Co., LTD)

A Region Search Algorithm and Improved Environment Map Building for Mobile Robot Navigation ................. 2734
Kwang-Sik Jin, Suk-Yoon Jung, Jung-Su Son, Tae-sung Yoon (Changwon Univ.)

Nonlinear System Modelling Using Neural Network and Genetic Algorithm ................................................. 2738
Hong-Bok Kim, Jung-Keun Kim, Seung-Wook Hwang, Yun-Su Ha, Gang-Gyoo Jin (Korea Maritime Univ.)

An Implementation of stabilizing controller for 2–Axis platform using adaptive fuzzy control and DSP ........ 2742
Gi-seok Ryu, Jin-Kyu Kim, Jong-Ho Park, Dae-Young Kim, Jong-Hwa Kim (Korea Maritime Univ.)

Swing Up and Stabilization Control of the Pendubot ....................................................................................... 2746
Ki-Jeong Yoo, Jae Hyuk Kwak, Joon–Hong Lim (Hanyang Univ.)

Vibration Control of a Intelligent Cantilever Beam with Added Mass ............................................................... 2750
Tae-Kyu Kwon, Byeong–Yong Choi, Suk–Jeong Lim, Yeo–Hung Yun, Seong–Cheol Lee (Chonbuk National Univ.)

D–FMP : Domestic Poster Session

Model–based fault diagnosis methodology using neural network and its application ........................................ 2754
In–Soo Lee, Kwang–Tae Kim(Sangju Univ.) Won–Chul Cho(Kyongdo Univ.), Jung–Teak Kim(KAWRI)
Kyung–Youn Kim,Yoon–Joon Lee(Chungju National Univ.)

The Fault Diagnosis of a Transformer Using Neural Network and Transfer Function .................................... 2758
Byung–koo Park, Jong–wook Kim, Sang Woo Kim, Poo–Gyeon Park, Park Tae Joon(POTECH)

Feedback Control of DC–DC Converters for Solar–Cell using DSP ............................................................... 2762
Sung–Rae Cho, Jae Hyuk Kwak, Joon–Hong Lim (Hanyang Univ.)

Discontinuous Surface Profile Measurement using Wavelength Scanning Interferometry ............................ 2766
Kang Chul Goo, Cho Yong Suck, Lee Jae Yang, Hahn Jae Won(Konkuk Univ.)

Localization and Thickness Measurement of the Measuring Plane Using Ultrasonic Sensor and Encoder .......................................................... 2771
Kim Hyung Kuk, Ahn Hee Tae, Lee Dong Hwal, Jeong Seung gwon, Bae Jong Il(Pusan National Univ.)

Bias Compensation Algorithm of Acceleration Sensor on Galloping Measurement System ........................ 2775
Hwan-Seong Kim(Kmaritime Univ.), Gi-Sig Byung(Pukyong Univ.), Sang–Gyun So(Hanbat Univ.)

A study on the load control using electric inertia ....................................................................................... 2779
Gil–Dong Kim, Hyun–Jun Park, Young–Jae Han, Dong–Yuk Jang, Jung–Min Jo(KRRI)

Development of Capacitance Measuring Equipment for Electrostatic Precipitator ....................................... 2783
Kim Seung Min, Lee Sung Jin, Nam Jung Han, Cho Chang Ho(DHIC)

A study on the speed control of induction motor using Neural Network ....................................................... 2787
Young-Jae Han, Hyun-Jun Park, Gil-Dong Kim, Dong-Uk Jang, Su-Gil Lee, Jung-Min Jo (KRRI)
A Study on Improvement of Automatic Vehicle's Comfortability using Fuzzy Controller ........... 2791
Bae Jong Il, Park H.S, Yeon-Wook Choi, Hwang Yeong-Yeon, Ha M.K. (PKNU)
A Study on Arc Force Sensor for a Robotic Welding Control System .................................... 2795
Son joon sik, Kim ill soo, Choi Seung Gap, Kueon Yeong Seob and Lee Duk Man (Mokpo University)
Development of a Robot arm capable of recognizing 3-D object using stereo vision ............... 2799
Sungjin Kim, Seungjun Choi, Hongphyo Park, Sangchul Won (POSTECH)
The Development of Multi-viewpoint Image Interpolation Method Using real–Image ............... 2803
Kwang–Won Yang, Young–Bin Park, Kyung–Bin Huh (DanKook Univ.)
Real–Time Analysis of Occupant Motion for Vehicle Simulator ............................................. 2807
Oh Kwang Seok, Son Kwon, Kim Kwanghoon, Oh Sangmin (Pusan National Univ.), Cho Kyunghyun (Cheju Univ.)
Triangular Cell Map Based Complete Coverage Navigation Method for Cleaning Robot ........... 2811
Joon Seop Oh, Jin Bae Park (Yonsei Univ.), Yoon Ho Choi (Kyonggi Univ.)
Gain Scheduling for Hot Strip Mill ......................................................................................... 2815
Sung-Han Park, Byoung-Joon Ahn, Juy–Yong Choi, Dong–Wook Lee, Man–Hyung Lee (Pusan National Univ.)
Hybrid position/force control of robot manipulator using fuzzy logic control ......................... 2819
Ahn Ihn Seok, Ahn Kwangsook, Kim Sangbin, Jang Junh, Park Sangbong (UDiduk Univ.)
Design of Robust Control for State–delay Systems ............................................................... 2822
Kwon Taek Joon, Ha In Chul, Han Myung Chul (Pusan National Univ.)
Obstacle–avoidance system for Redundant Field Robot ..................................................... 2826
Park Chan Ho, Hwang Jea Suk, Lee Byung Ryong, Yang Soon Yong, Ahn Kyung Kwan (Univ. of Ulsan)
Development of automatic measurement method of concentricity and roundness using image processing technique, .............................................................. 2830
Hyung–Wook Moon, Kyung–Moo Huh (Dankook Univ.)
A Study on the Fabrication of Micro Actuator for Smart Catheter using Shape Memory Alloy ... 2834
Min–Sung Kim, Doo–Hywan Park, Sang–Koo Sung, Jong–Won Joon, Joon–Tark Lee (Dong–A Univ.)
Development of Measurement System of Moving Distance Using low–cost Accelerometer ....... 2838
Seong–Yun Cho, Jin–Ho Kim, Chan–Gook Park (Kwangwoon Univ.)
Discrete–time Sliding Mode Control with Input Shaping for flexible systems ......................... 2842
Lim Hyun Woo, Chung Chung Choo (Hanyang Univ.)
Remote Measurement for ECU Self Diagnostic Signal ......................................................... 2846
Lee Seong–Cheol, Jeong Jin–Ho, Yun Yeo–Hun, Lee Young–Chun, Kwon Tae–Kyung (Chonbuk National Univ.)
Design of Input/Output Interface for ARM/AMBA based Board Using VHDL ....................... 2850
Dong–Wan Ryoo, Jeon–Woo Lee (ETRI)
Tracking of an Object using Image Processing through JAVA .............................................. 2853
Chang Ho Ji, Lee Dong Yong, Jeong Seung Gweon, Chang Yu Shin, Lee Man Hyung (Pusan National Univ.) Bae Jong Il (Pukyong National Univ.)
A Study on Development of 3D Outsole Profile Scanner for Footwear Bonding Automation .... 2857
Lho Tae–Jung, Park Pil–Gyu, Suh Jong–Chul (Tongmyong University of Information Technology), Park Dong–Joo (Namux Co.), Ahn Hee–Tae (Inner Tech Co.)
The optimal path planning using critical points ........................................................................ 2861
Lee Jin–Sun, Choi Chang–Hyuk, Song Jae–Bok, Chung Woo–Jin (Korea Univ.), Kim Munsang (KIST)
Measurement of vibration using a 3–facet mirror .................................................................... 2865
Park Won Shik, Cho Hyung Suk (KAIST), Byun Yong Kyu (SAIT)
A Development ATCS for Automating the Stacking Crane .................................................... 2869
Choi Sung Uk, Lee C.H.Kim Jung Ho, Lee J.W. Lee Young Jin, Lee Kwon Soon, (Dong–A Univ.)
Implementation of Unmanned Remote Supervisory System having Multipurpose Measuring Modules .......................................................... 2873
Park Jung Hoon, Hong Sung Hoon, Kang Moon Sung (Chongju Univ.)
Embedded Web Server for Monitoring and Control of a Mobile Robot ................................... 2877
Sin Yonggak, Kwak Jaehyuk, Lim Joohong (Hanyang Univ.)
Slices Analysis Method of Petri nets in FMS Using the Transitive Matrix ................................. 2881

2001. 10. 17~21, Cheju National University, Jeju, Korea ICCAS 2001
Kim Jung Won, Lee Jongkun, Song Yujin, Kim Jongwook (Changwon National Univ.)
A Study on Trajectory Tracking Control of Field Robot ...................................................... 2887

Seo Woo Seog, Kim Sung Su, Yang Soon Yong, Lee Byung Ryong, Ahn Kyung Kwan (University of Ulsan)
Development of Force Reflecting Joystick for Field Robot ................................................. 2891

Song In Sung, Ahn Kyung–Kwan, Yang Soon–Yong, Lee Byung–Ryong (Univ. of Ulsan)
Research of Stable Grasping for Handling tasks in Field Robot ........................................... 2895

Park Kyung Taek, Kim Sung su, Yang Soon Yong, Lee Byung Rong, Ahn Kyoung Kwan (Univ. of Ulsan)
A Development of Carrier Phase DGPS Aided by INS ...................................................... 2899

Lee Kiwon, Lee Jaeho, Seo Hungserk and Sung Taekyoung (Chungnam National Univ.)
Remote Fuzzy Logic Control of Networked Control system in Profibus–DP ............................. 2903

Lee Kyung Chang and Lee Suk (Pusan National Univ.)
Real–Time Performance Evaluation of network in Ethernet based Intranet ............................ 2907

Pae Duck Jin and Kim Dae Won (Myoungji Univ.)
Optimization for the composition of assembly cell in the optical–components system .......... 2911

Kim Sok Ha, Kim Young Ho, Seung Gweon Jeong, Lee Man Hyung (Pusan National Univ.)
Performance Evaluation of Switched Ethernet for Real–time Industrial Network .................. 2914

Kim Tae Jun, Lee Kyung Chang, Kim Do Hyung and Lee Suk (Pusan National Univ.)
Development of an Integrated Reactor UT Inspection System ............................................ 2918

Yoo Rark Choi and Jae Cheol Lee (KAERI)
Feature Based Map Building Method Using Sonar Data ...................................................... 2922

Kang Byung Soo (KIM) and Lim Jong Hwan (Chu University)
A study on target tracking system for a mobile robot using ultrasonic sensors ...................... 2938

Kim Hon Hui, Han Dong Hui and Ha Yun Su (Korea Maritime Univ.)
A Navigation Algorithm for Autonomous Mobile Robots using Artificial Immune Networks and Fuzzy Systems .............................................................. 2942

Kim Yang–Hyun, Lee Dong–Je, Lee Min–Jung and Choi Young–Kiu (Pusan National Univ.)
Color Object Recognition and Real–Time Tracking using Neural Networks .......................... 2946

C Choi Dong–Sun, Lee Min–Jung and Choi Young–Kiu (Pusan National Univ.)

D–SMP : Domestic Poster Session

Development of train speed controller for EMU using servo–controller ................................ 2950
Su–Gil Lee, Seong–Ho Han, Young Jae Han (KRI)
Implementation of OSEK/VDX for Automotive Body Control System ................................. 2954
Cooperative Coordination Method of Neural Network Controller Module for Autonomous Mobile Robot Navigation ................................................................................. 2958
Han Seong–Joo, Oh Se–Young (POSTECH)
Self–Tuning Gain–Scheduled Skyhook Control for Semi–Active Suspension Systems: Implementation and Experiment ................................................................. 2962
Hong Kyung–Tae, Sohn Hyun–Chul, Jung Jae–Ryong, Hong Keum Shik (Pusan National Univ.)
Emotion–Based Intelligent Model ..................................................................................... 2966
Sung–Bum Ko (Chonan Univ.) and Gi–Young Lim (Hanbat Univ.)
